ANNUAL ENERGY OUTLOOK 2006

with

Guy Caruso

Administrator, U.S. Energy Information Administration

9:00 am – 10:30 am

Tuesday, January 10, 2006

CSIS B-1 Conference Level, Room B
1800 K Street, NW

The CSIS Energy Program is pleased to host Guy Caruso to discuss the new *Annual Energy Outlook 2006*. (NOTE: The full report is not yet available.)

The new AEO 2006 has some surprises in store: looking more closely at the recent years of volatility in the world oil market, the report assumes tighter oil supplies and less spare productive capacity in OPEC, resulting in a significantly higher oil price. These trends have far reaching effects on the other established forms of energy: natural gas, coal, and nuclear power, and on alternative energies, including transportation fuels. Mr. Caruso will highlight key changes and conclusions of the AEO 2006 and take questions following his presentation.

We hope that you will be able to join us for this important session. Please send your RSVP, acceptances only, by e-mail to energy@csis.org or by fax to (202) 775-3199. If you have any questions, please contact Lisa Hyland at (202) 775-3115.

_____ I will attend the January 10th briefing with Guy Caruso.
