

GPS: Military System/Public Utility

December 3, 2003

9:00 AM – 12:00 PM

Center for Strategic and International Studies

Basement Conference Room B1A

The Center for Strategic and International Studies (CSIS) and the Space Enterprise Council of the U.S. Chamber of Commerce co-hosted this session on the Global Positioning System (GPS). The session included two panels to examine the current and future role of GPS in the economy and at what U.S. policy should be for the GPS system.
