

CSIS WORKING GROUP
on
LONG-TERM IMMIGRATION PROJECTIONS

September 8, 2005

Biographies

Thomas Buettner is Chief of the Estimates and Projection Section at the UN Population Division. Prior to joining UN, he was a research scholar at the International Institute for Applied Systems Analysis (IIASA) in Laxenburg, Austria (1989-91). Between 1983 and 1989, he headed a research group, “Forecasting of Demographic Systems,” at the Institute for Sociology and Social Policy of the Academy of Sciences in Berlin, Germany. He is author of number of articles on demographic trends in Europe and North America. He holds a DSc. in Demography from Academy of Sciences and a Ph.D. in Demography from College of Economics, both of which are located in Berlin, Germany.

David Coleman has been the Reader in Demography at Oxford University since 1996. Between 1985 and 1987 Professor Coleman was a Special Adviser for the British government. Researches include the comparative demographic trends in the industrial world and the demography of ethnic minorities. He has been a consultant for the Home Office and the United Nations. He has published over 100 papers and eight books. He was joint editor of the *European Journal of Population* from 1992 to 2000 and in 1997 and again in 2001 was elected to the Council of the International Union for the Scientific Study of Population.

Edward J. DeMarco is the Assistant Deputy Commissioner for Policy at the Social Security Administration where he oversees the policy, research, and statistical programs in the Office of Policy. He joined SSA in 2003 as Associate Commissioner for Research, Evaluation, and Statistics. Prior to then, Mr. DeMarco was the Director of the Office of Financial Institutions Policy at the U.S. Department of the Treasury where he was responsible for policy analysis on a wide range of financial institutions-related issues, including deposit insurance reform, pensions and federal pension insurance, terrorism-risk insurance, government-sponsored enterprises, bank powers and regulation, and risk-based capital requirements for financial institutions. Before joining the Treasury Department, Mr. DeMarco was a senior financial economist at the U.S. General Accounting Office. He has a B.A. in economics from the University of Notre Dame and a Ph.D. in economics from the University of Maryland.

Nicholas Eberstadt holds the Henry Wendt Chair in Political Economy at the American Enterprise Institute (AEI) in Washington DC, and is Senior Adviser to the National Bureau of Asian Research (NBR) in Seattle, WA. He serves on the Advisory Board of the Korea Economic Institute of America, and is a founding member of the U.S. Committee for Human Rights in North Korea. Mr. Eberstadt regularly consults for governmental and international organizations, including such institutions as the U.S. Census Bureau, U.S. State Department, USAID, and World Bank. He has published over three hundred studies and articles in scholarly and popular journals, mainly on topics in demography, international development, and East Asian security. His books dozen-plus books and monographs include *The Poverty of Communism*, *The Population of North Korea*, *The Tyranny of Numbers*, *The End of North Korea*, *Korea's Future and the Great Power* and the forthcoming *North Korea's Economy Between Crisis*

and Catastrophe. Mr. Eberstadt earned his A.B., M.P.A. and Ph.D. from Harvard, and his M.Sc. from the London School of Economics.

Barry Edmonston is Director of the Population Research Center and Professor in the School of Urban Studies and Planning, Portland State University. He received his Ph.D. degree, with a specialization in Population Studies, from the University of Michigan. He has previously been a faculty member at Stanford University and Cornell University and served as a researcher at the Urban Institute and the National Academy of Sciences. His teaching interests include social demography, immigration, population distribution, urban ecology, demographic methods, and applied statistics. His recent articles and books have dealt with public policies issues for the U.S. census, the settlement and adaptation of immigrants, and the demographic and social effects of immigration. His current research interests are in the demographic effects of immigration, immigration statistics, internal migration of the foreign-born, and demographic changes in homeownership.

Stephen C. Goss is currently Chief Actuary at the Social Security Administration. Mr. Goss joined the Office of the Chief Actuary in 1973 after graduating from the University of Virginia with a Masters Degree in Mathematics. He graduated from the University of Pennsylvania in 1971 with a Bachelors degree in mathematics and economics. He has worked in areas related to health insurance as well as pension, disability, and survivor protection. Mr. Goss has written articles and actuarial studies on several topics and has made presentations and participated in panel discussions at numerous conferences. He has worked closely with members of the executive branch, members of Congress and their staff, and numerous commissions, as well as with private organizations. Mr. Goss is a member of the Society of Actuaries, the American Academy of Actuaries, the National Academy of Social Insurance, the Social Insurance Committee of the American Academy of Actuaries, and the Social Security Retirement and Disability Income Committee of the Society of Actuaries.

Jan Hofmann is Senior Analyst with Deutsche Bank Research in Frankfurt/Germany. DB Research is an internationally renowned think tank, analysing trends in business, society, technology, and financial markets. Jan Hofmann's current focus is on innovation processes, economic and firm-level implications of emerging technologies, and quantitative as well as qualitative methods of strategic foresight. Before joining Deutsche Bank in 2002, he worked for four years on similar topics in the futures research group of DaimlerChrysler. He holds degrees in physics (M.Sc. equivalent) from Technical University Berlin and industrial design (M.A. equivalent) from Berlin University of the Arts. He also holds a Ph.D. in natural sciences, awarded by Technical University Munich for his work on human computer interaction.

Frederick W. Hollmann is a demographer and statistician of the Population Projections Branch at the U.S. Census Bureau. He is the author of numerous articles, including "U.S. Census Bureau Measurement of Net International Migration to the United States: 1990 to 2000" (U.S. Census Bureau; 2001, with Tammany J. Mulder *et al.*), "Methodology and Assumptions for the Population Projections of the United States: 1999 to 2100" (U.S. Census Bureau; 2000, with Tammany Mulder and Jeffrey Kallan), and "Problems of Applying Current Immigration Data to Population Projections: The Case of the United States" (Eurostat; 1999).

Neil Howe is a historian, economist, and demographer who writes and speaks frequently on the aging of the population, long-term fiscal policy, and generations in history. He is a Senior Associate at the Center for Strategic and International Studies, where he works with the Global Aging Initiative, a Senior Policy Advisor to the Blackstone Group, and a Senior Advisor to the Concord Coalition. He is also cofounder of LifeCourse Associates, a marketing, HR, and strategic planning consultancy serving corporate, government, and nonprofit clients. His coauthored books include *On Borrowed Time* (1988), *Generations* (1991), *13th-Gen* (1993), *The Fourth Turning* (1997), and *Millennials Rising* (2000). He

holds graduate degrees in history and economics from Yale University. He lives in Great Falls, Virginia, with his wife Simona and two children, Giorgia and Nathaniel.

Richard Jackson writes on public policy issues arising from the aging of America's and the world's population. He is currently a Senior Fellow at the Center for Strategic and International Studies, where he directs the Global Aging Initiative, an Adjunct Fellow at the Hudson Institute, and a Senior Advisor to the Concord Coalition. Jackson is the author of numerous policy studies, including *The Graying of the Middle Kingdom* (CSIS and Prudential Financial; 2004), *Aging Vulnerability Index* (CSIS and Watson Wyatt Worldwide; 2003), and *The Global Retirement Crisis* (CSIS and Citigroup; 2002). Jackson regularly speaks on long-term demographic and economic issues and is often quoted in the press. He holds a B.A. in classics from SUNY at Albany and a Ph.D. in economic history from Yale University. He lives in Alexandria, Virginia, with his wife Perrine and two children, Benjamin and Brian.

Wolfgang Lutz is the Leader of the World Population Program at the International Institute for Applied Systems Analysis (IIASA). He joined IIASA in October 1985. He has worked on family demography, fertility analysis, population projection, and the interaction between population and environment. He has been conducting a series of in-depth studies on population-development-environment interactions in Mexico, several African countries, and Asia. He is the author of the series of world population projections produced at IIASA and has developed approaches for projecting education and human capital. He is also principal investigator of the Asian MetaCentre for Population and Sustainable Development Analysis funded by the Wellcome Trust with headquarters at the National University of Singapore. Professor Lutz is author and editor of 28 books and more than 150 refereed articles (including some in "Science" and "Nature"). He serves on the board of directors of the African Population and Health Research Center in Nairobi, Kenya; the Max Planck Institute for Demographic Research in Rostock, Germany; and the Population Reference Bureau in Washington, D.C. He holds a Ph.D. in Demography from the University of Pennsylvania (1983) and a second doctorate (Habilitation) from the University of Vienna.

Douglas S. Massey received his PhD in 1978 from Princeton University and has served on the faculties of the University of Chicago and the University of Pennsylvania. His research focuses on international migration, race and housing, discrimination, education, urban poverty, and Latin America, especially Mexico. He is the author, most recently, of *Return of the L-Word: A Liberal Vision for the New Century* (Princeton University Press, 2005) and *Strangers in a Strange Land: Humans in an Urbanizing World* (Norton, 2005). He is a member of the National Academy of Sciences, the American Academy of Arts and Sciences, and the American Philosophical Society. He is currently president of the American Academy of Political and Social Sciences and past-president of the American Sociological Association and the Population Association of America.

Anna Maria Mayda has been at Georgetown University since 2003, with a joint appointment in the Department of Economics and the School of Foreign Service. She studied statistics and economics at University of Rome La Sapienza, where she received her degree summa cum laude in 1997. Before graduate school, she worked for the World Bank in the Latin America and the Caribbean Region Unit. In June 2003, she completed a PhD in Economics at Harvard University, where she was also a doctoral fellow at the Center for International Development. She joined IZA as a Research Affiliate during the same year. In the spring of 2004, she held a visiting position at the International Monetary Fund where she served as a Resident Scholar at the Trade Unit of the Research Department. Her research interests include the political economy of trade policy, preferential trade agreements, international trade negotiations, the political economy of migration policy, and the determinants of international migration flows. In particular, Anna Maria has worked on the determinants of individual attitudes towards trade

and immigration across countries. Her paper "Why are Some People (and Countries) More Protectionist than Others?" (joint with Dani Rodrik) is forthcoming in the *European Economic Review*.

Steven A. Nyce is a Senior Retirement Research Associate with the Research and Information Center of Watson Wyatt Worldwide in Washington, D.C. He has written numerous articles and spoken regularly at public and private forums on the impacts of demographic aging on the developed economies. His research also focuses on employer-sponsored pensions, worker productivity and the relationship between employee benefits and the profitability of sponsoring organizations. He holds a Ph.D. in economics from the University of Notre Dame.

Jeffrey S. Passel, currently Senior Research Associate at the Pew Hispanic Center, is a nationally known expert on immigration to the United States and the demography racial and ethnic groups. Passel formerly served as principal research associate at the Urban Institute's Labor, Human Services and Population Center. Passel has authored numerous studies on immigrant populations in America, focusing on such topics as undocumented immigration, the economic and fiscal impact of the foreign born, and the impact of welfare reform on immigrant populations. Selected publications include: *Immigration and Immigrants: Setting the Record Straight* (with Michael Fix), *Immigration and Ethnicity: The Integration of America's Newest Immigrants* (edited with Barry Edmonston), and *Immigration, Fertility, and the Future American Work Force* (with Joan Kahn). Prior to joining the Urban Institute in 1989, he directed the Census Bureau's program of population estimates and projections and its research on demographic methods for measuring census undercount. Passel has a B.A. in Mathematics from M.I.T., an M.A. in Sociology from the University of Texas at Austin, and a Ph.D. in Social Relations from The Johns Hopkins University.

Michael S. Teitelbaum is Program Director for Research and Technology at the Alfred P. Sloan Foundation. Mr. Teitelbaum is also a faculty member at Oxford University and Princeton University—as well as Staff Director of the Select Committee on Population, U.S. House of Representatives. He served as a Commissioner of the U.S. Commission on Immigration Reform which completed its work in December 1997. From 1980 to 1990, he served as one of 12 Commissioners of the U.S. Commission for the Study of International Migration and Cooperative Economic Development. Mr. Teitelbaum is a regular speaker on the subjects of immigration and demographic change and a frequent invited witness before Committees of the United States Congress. His recent books include: *Political Demography, Demographic Engineering* (Berghahn Books; 2001, co-author), *A Question of Numbers: High Migration, Low Fertility, and the Politics of National Identity* (Hill and Wang; 1998, co-author), *Threatened Peoples, Threatened Borders* (W.W. Norton; 1995, co-editor), and *Population and Resources in Western Intellectual Traditions* (Cambridge University Press; 1989, co-editor). Mr. Teitelbaum was educated at Reed College and at Oxford University, where he was a Rhodes Scholar.
