

The Demographics of Political Violence: Youth Bulges, Insecurity, and Conflict

Henrik Urdal

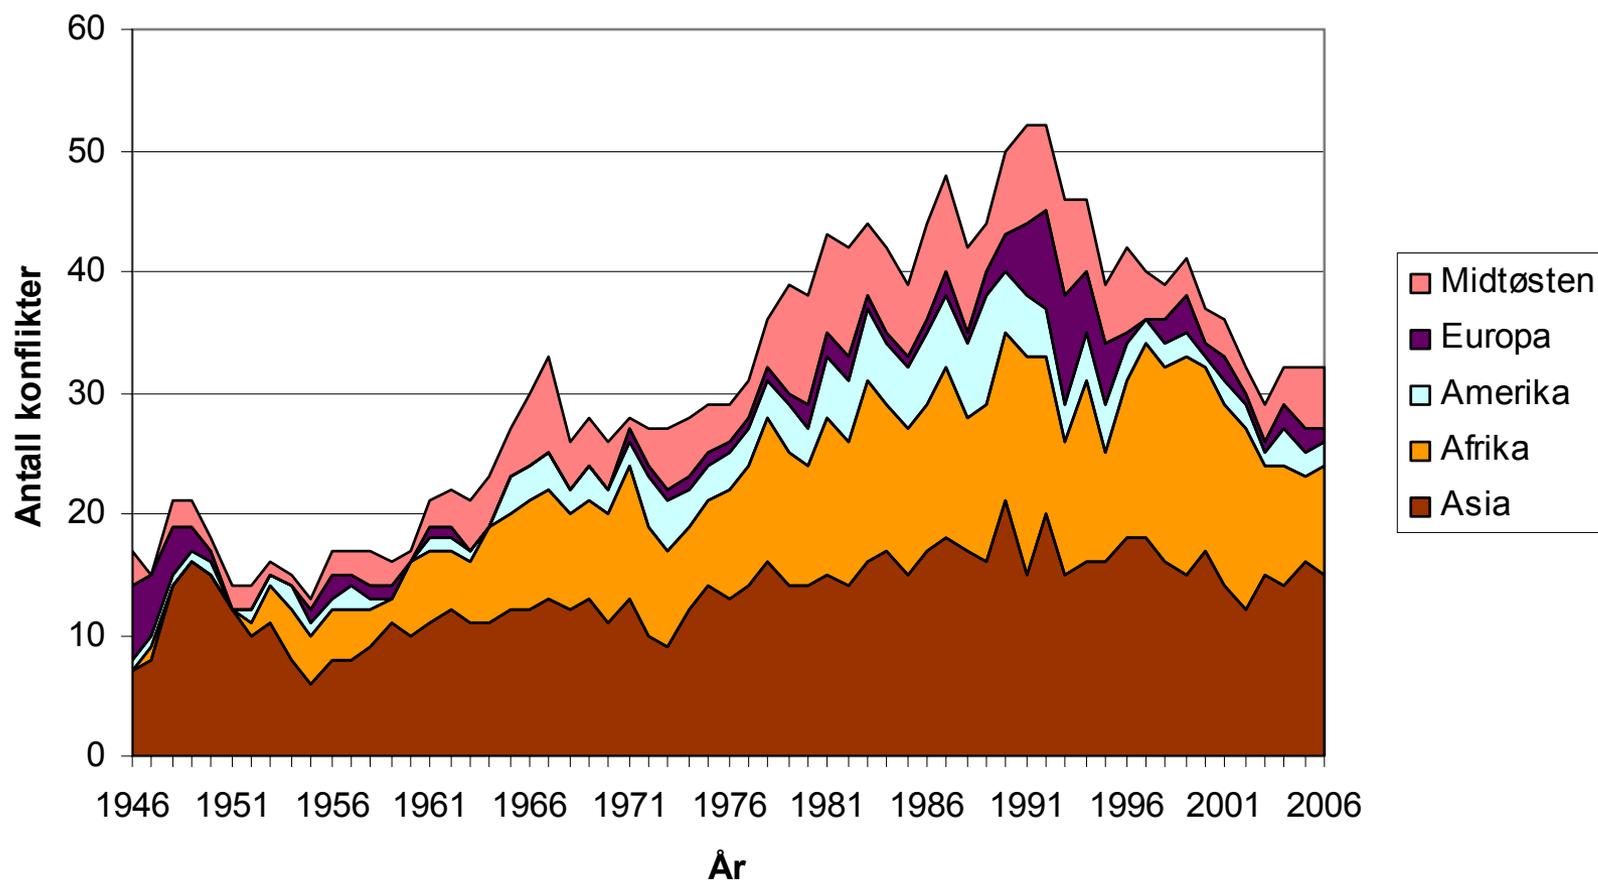

Centre for the Study of Civil War (PRIO)

Presentation to the 'Global Aging Forum'
Center for Strategic & International Studies
Washington D.C., October 5 2007

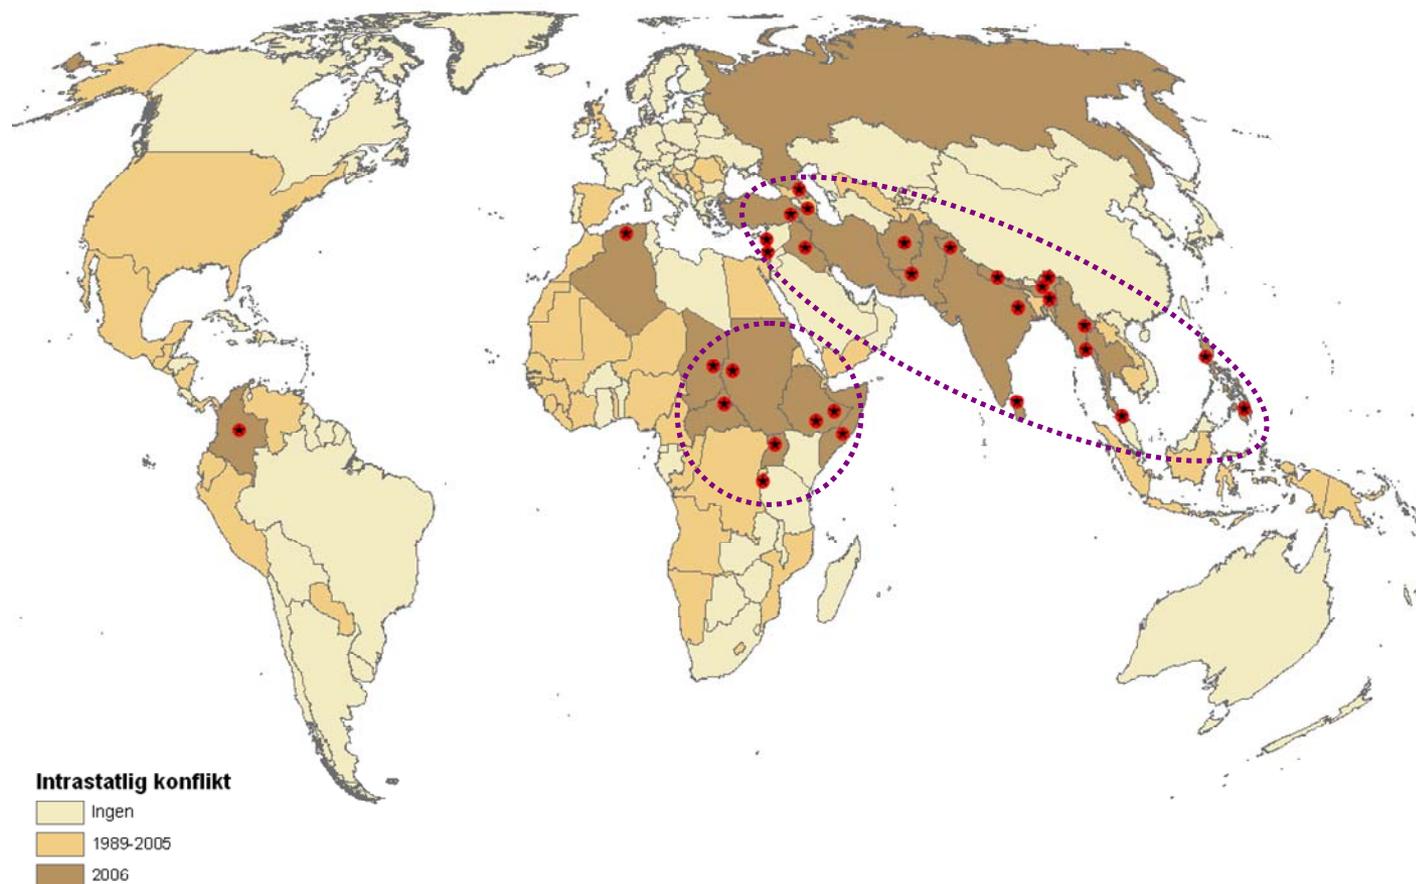

World Youth Population

Armed Conflict by Region 1946-2006

The Location of Armed Conflict, 2006

Source: Harbom & Wallerstein, 2007. Map produced by Halvard Buhaug.

Youth Bulges

- The opportunity perspective
 - Low opportunity cost
 - Relative cohort size
 - Economic growth
 - Education

Youth Bulges

- The grievance perspective
 - Unemployment
 - Education
 - Democracy
 - Urbanization

Youth Bulges and Political Violence

- Global multivariate model
- Three measures:
 - armed conflict
 - terrorism
 - riots and violent demonstrations
- Contextual factors

Youth Bulges

Age composition and political violence 1950–2000

	Armed conflict onset	Terrorism	Riots and violent demonstrations
Youth bulges	Higher risk	Higher risk	Higher risk
YB * Economic growth	Not significant	Higher risk	Not significant
YB * Dependency ratio	Not significant	Not significant	Higher risk
YB * Regime type	Higher risk	Not significant	Not significant
YB * Tertiary edu growth	Not significant	Higher risk	Not significant

Based on Urdal, Henrik 2006. 'A Clash of Generations? Youth Bulges and Political Violence', *International Studies Quarterly* 50(3): pp–pp.

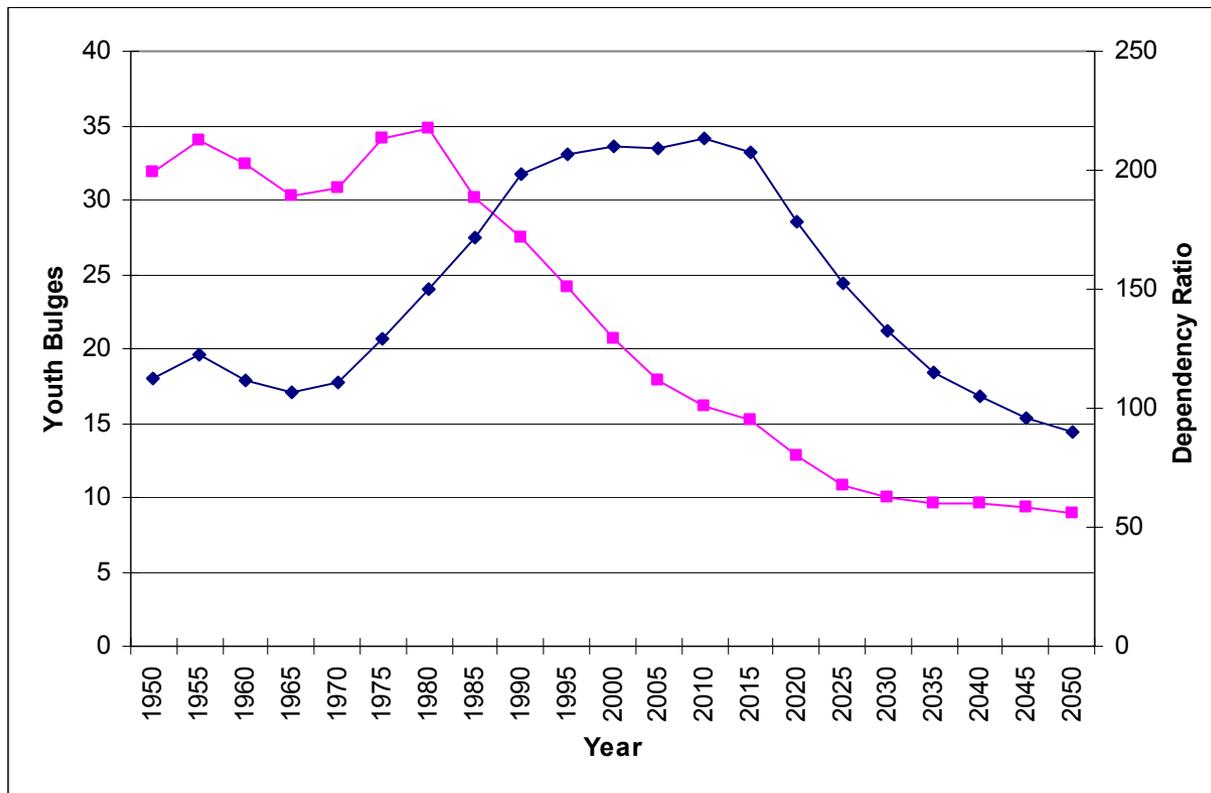

Qualifications

- No threshold values
- Robust for low-intensity conflict, but not for full-fledged civil war
- Demography is not destiny: most countries with large youth bulges avoid conflict most of the time
- Governments hold the key to whether large youth cohorts are blessing or curse
- Challenges: the evidence base for what works is limited; lack of competent government

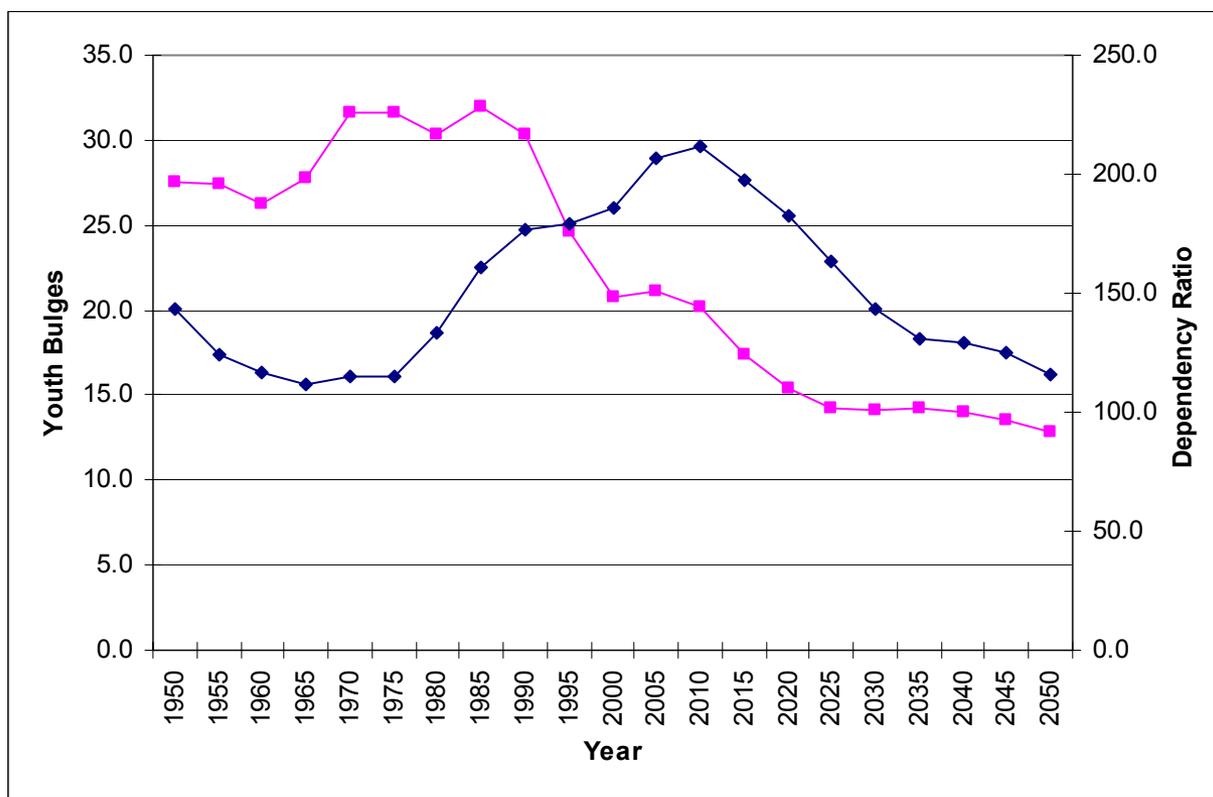

The Future of Youth Bulges

- Fertility and youth bulges decline universally
- As fertility declines, a demographic window of opportunity opens
- The realization of this opportunity is not given
- Many countries and regions will still face a significant demographic challenge for decades to come

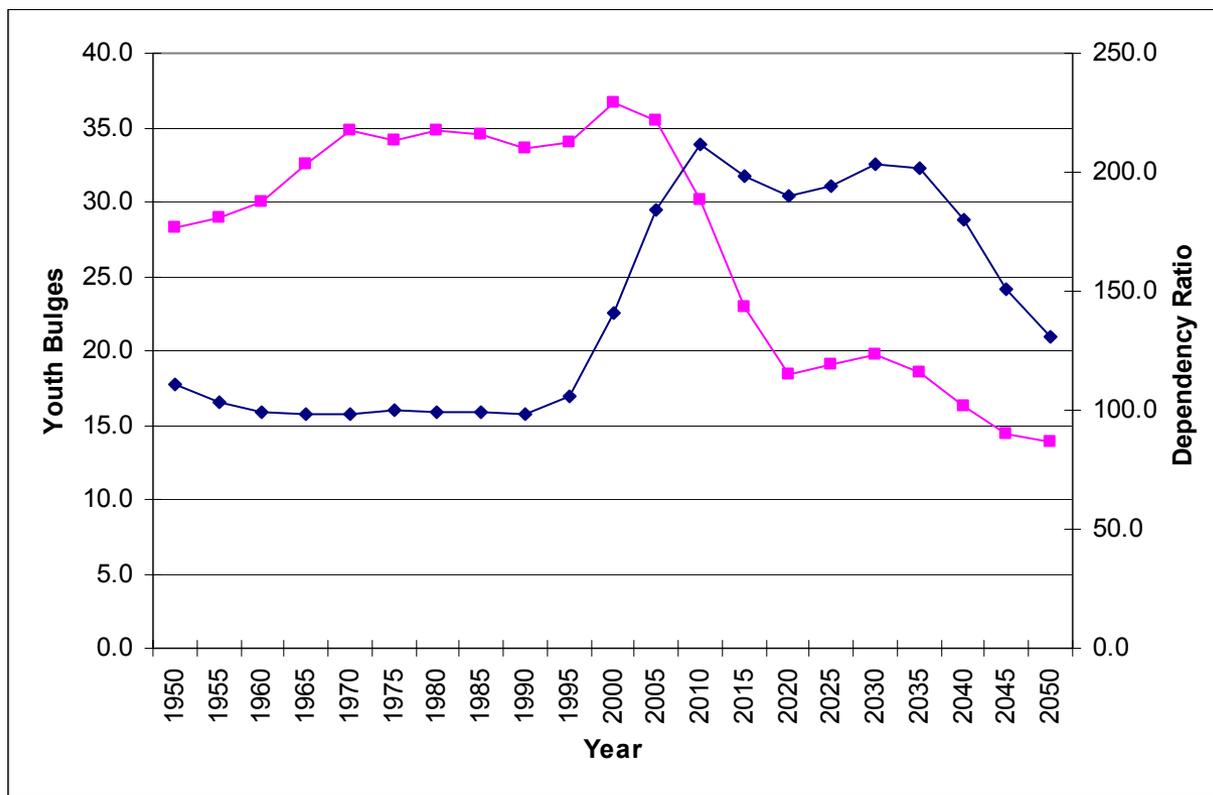

South Korea

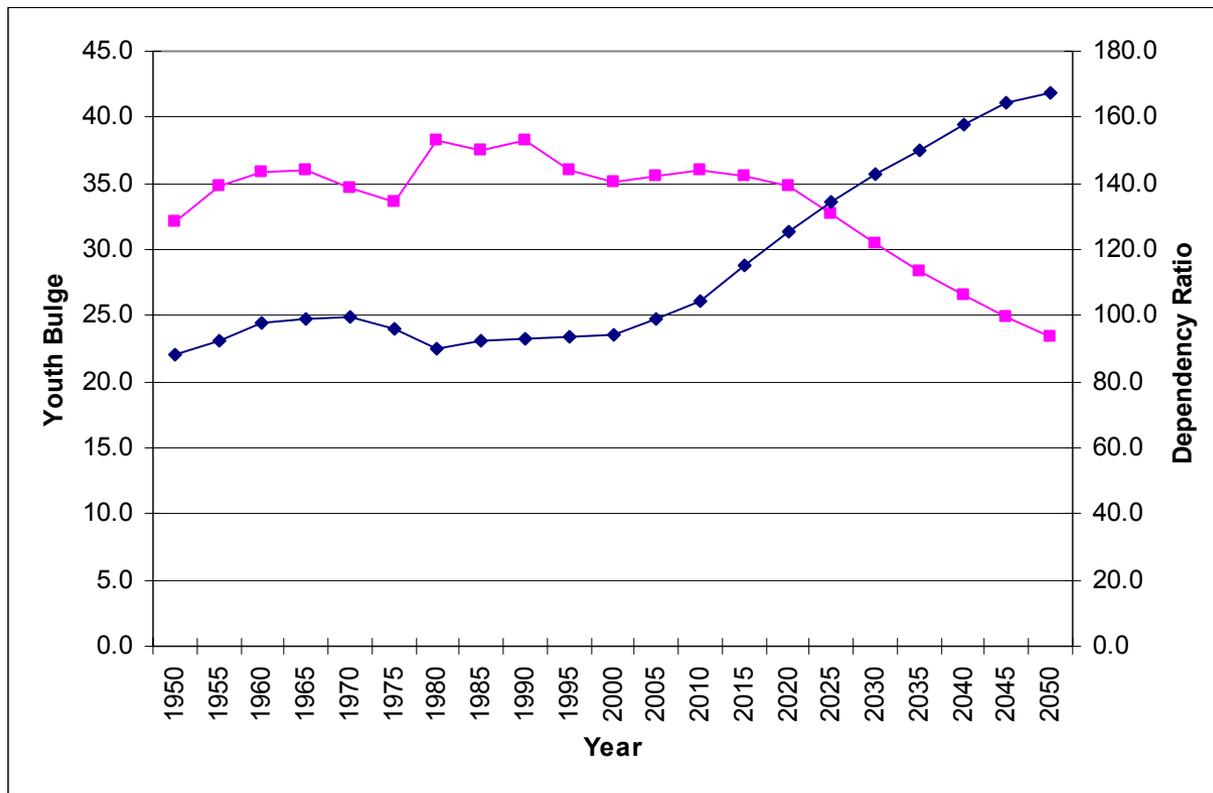

China

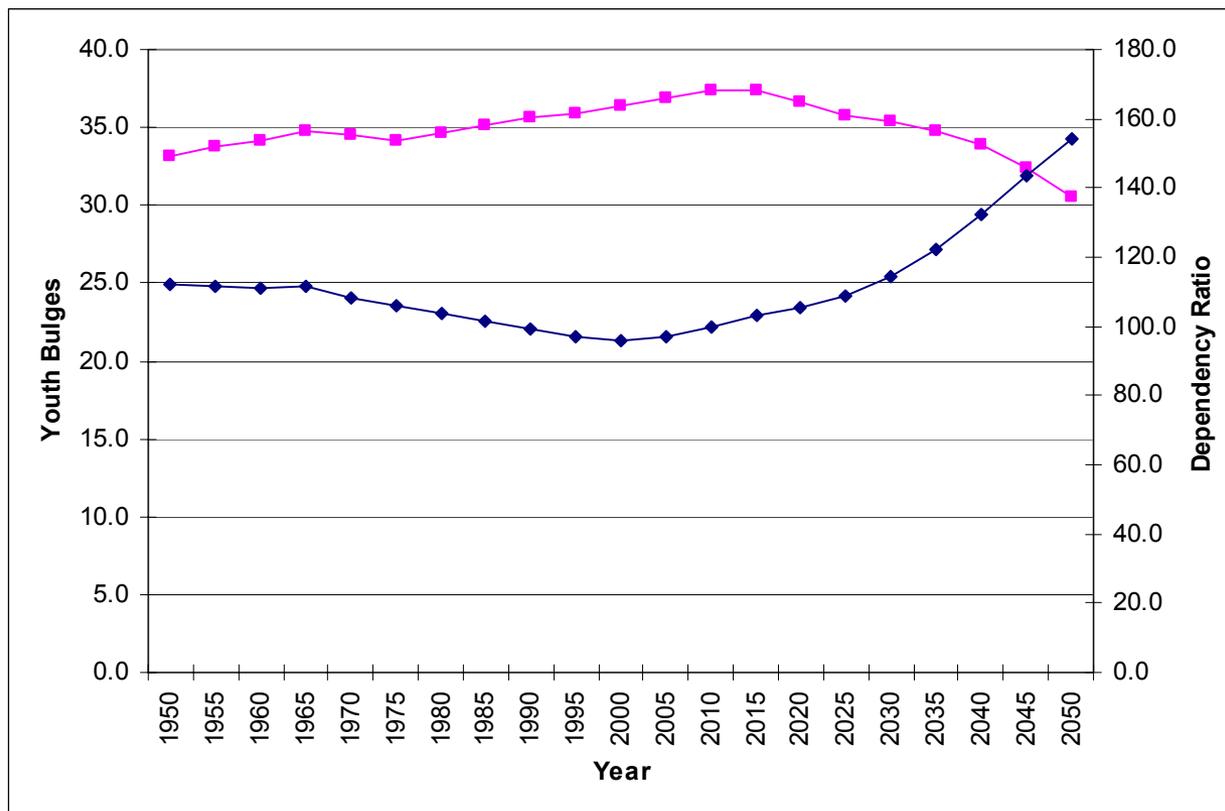

Iran

Palestine

Afghanistan

Future Research Priorities

- Youth and education
- Urban youth populations
- Youth and governance
- Assessments of youth programs
