Introduction and Welcome: Frank Verraastro

Moderator: **Dr. James Schlesinger**

Speakers:

Marvin Fertel

Senior Vice President and Chief Nuclear Officer, Nuclear Energy Institute

Phil Sharp

President, Resources for the Future

Michael Wallace

CEO, Constellation Energy

Keynote Address

10:30 am – 11:30 am
Introduction by: Dr. John Hamre

Speaker:

Dr. Dale Klein

Chairman, Nuclear Regulatory Commission

In response to concerns about climate change and energy security, policymakers, business leaders and the public at large are reexamining the future role of commercial nuclear power in the U.S. and globally. This meeting will focus on key issues which both promote and temper prospects for a nuclear renaissance in the U.S. and implications for wider global expansion in order to meet projected energy demand. Today’s discussions will serve to frame the broader questions surrounding nuclear power issues.

The Center for Strategic and International Studies (CSIS) is a nonprofit, bipartisan public policy organization established in 1962 to advance global security and prosperity in an era of economic and political transformation by providing strategic insights and practical policy solutions to decision makers.
