# **The Evolving Security Situation in Iraq: The Continuing Need for Strategic Patience**

**Anthony H. Cordesman  
Arleigh A. Burke Chair**

**Revised: January 21, 2008**

# The Challenge of Strategic Patience

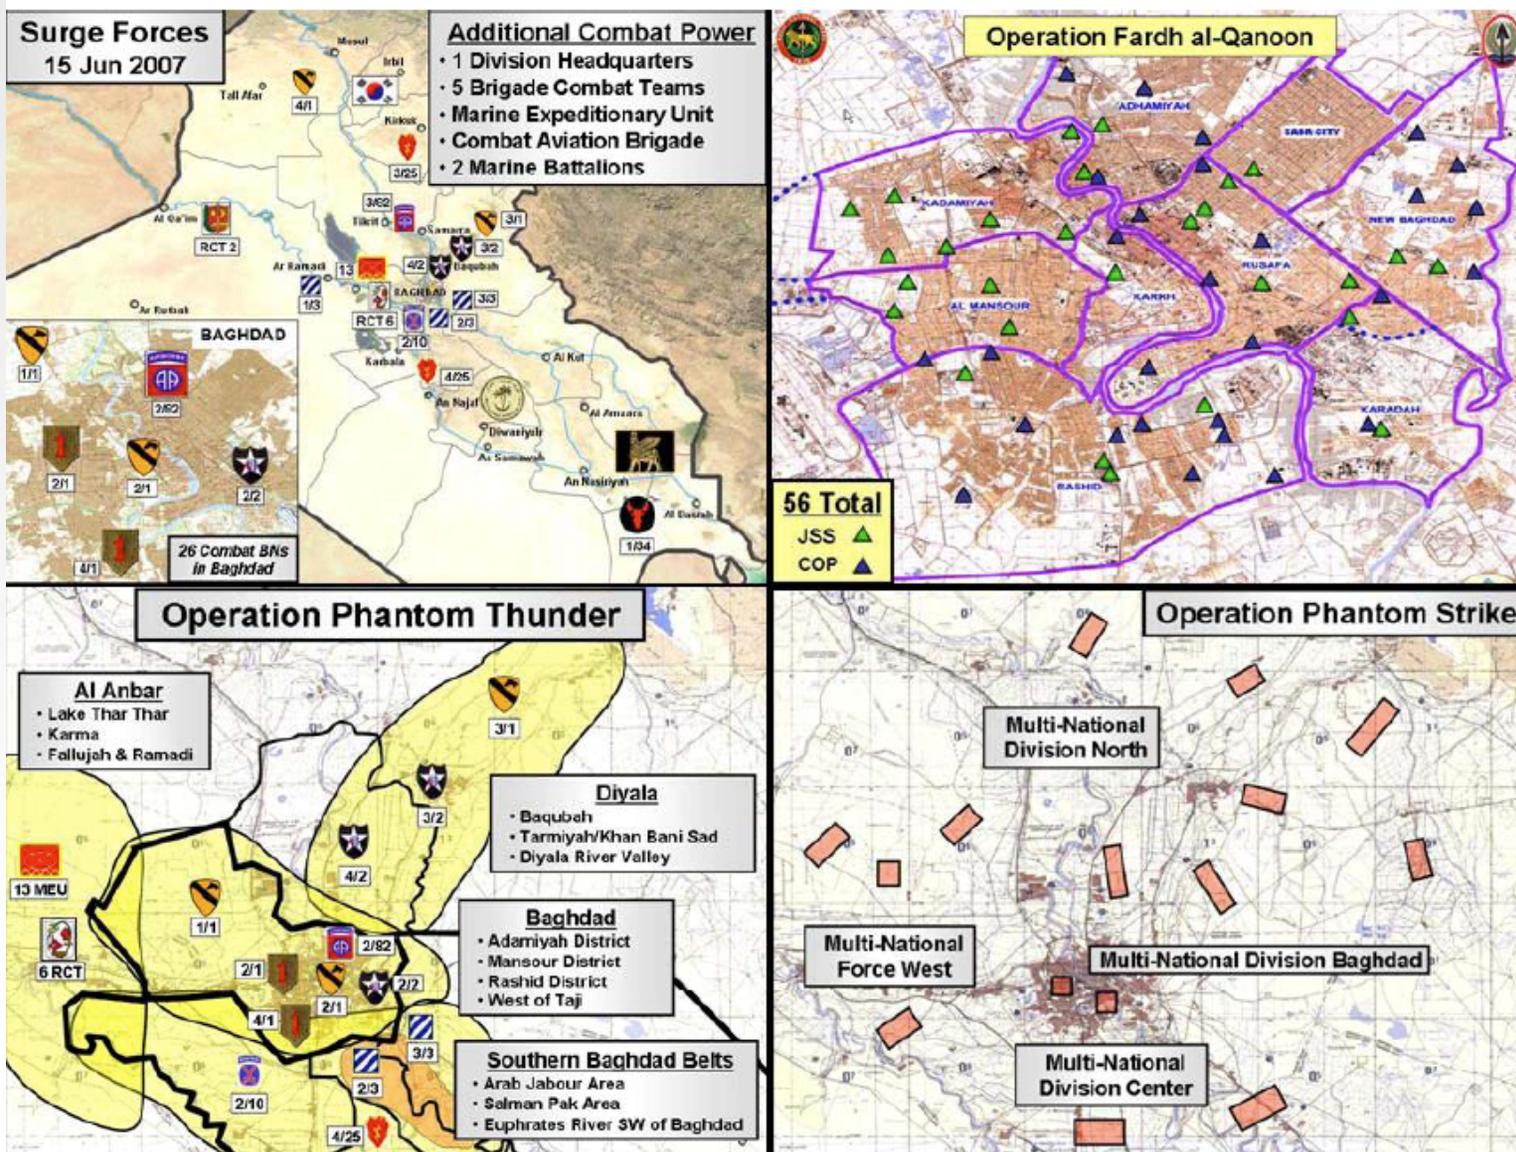

- Consolidate gains against Al Qa'ida in Mesopotamia
- Move towards stable accommodation: Change de-Baathification law, provincial powers act and elections, oil law, etc.
- Keep Shi'ite militias (Sadr forces) under control, and prevent more sectarian and ethnic cleansing in greater Baghdad area.
- Consolidate creation of tribal militias, ensure they get proper central government support, and that central government recognizes importance of Sunni Sheiks.
- Stabilize provinces that still have serious conflict - Ninewa, Salah ad Din, Diyala -- and prevent Al Qa'ida in Mesopotamia forces from moving north.
- Avoid major intra-Shi'ite power struggles and conflicts in south.
- Limit Kurd, Arab, minority fighting in North.
- Resolve the "federalism" issue through peaceful referendums.
- Develop truly capable Iraqi Army and regular forces to phase US role down to overwatch.
- Find solution to failure to develop effective approach to police force, and to dealing with local security forces, militias, and Facilities Protection Force.
- Establish effective local criminal justice system and local, provincial and national government presence.

# Mapping Progress: The Fighting in 2007<sup>3</sup>

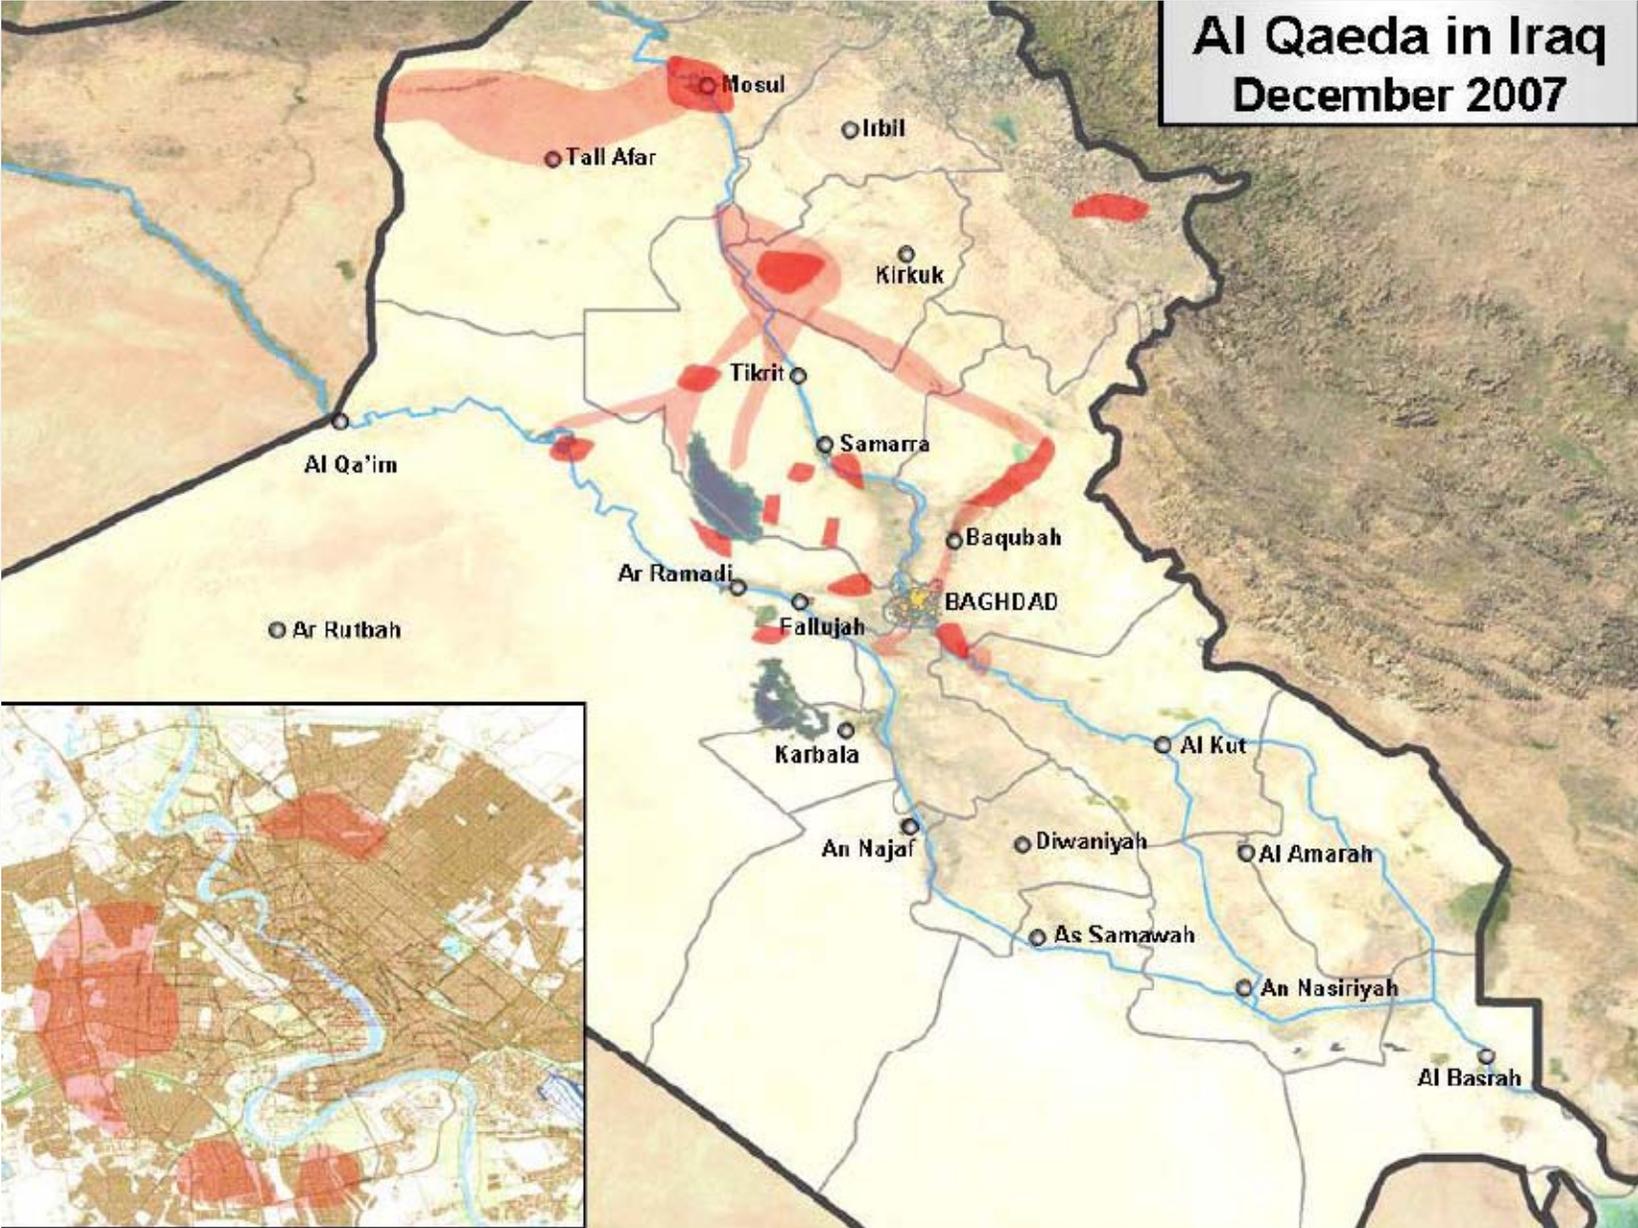

- Major gains in defeating Al Qa'ida and reducing its area of operations.
- Shift from “win” tactics to “win and hold;” deny Al Qai'da the ability to recover.
- Sufficient US forces for Baghdad area and Diyala.
- Spontaneous “tribal awakening” in Anbar, creating of local forces, spread into other areas.
- Growing support from Iraqi Army
- Sadr and JAM largely stands aside, although potential threat remains.
- Reduction in flow of foreign fighters, pressure from Syria and Iran
- *But:*
- *Al Qa'ida far from defeated and shifting to other areas.*
- *Iran and Syria still present problems.*
- *Arab-Kured-Turcoman tensions a serious threat in north.*
- *Inter-Shi'ite (Sadr vs. Hakim factions) serious problem in south.*
- *Ethnic and sectarian cleansing continue at lower level.*
- *Crime and violence, often with ethno-sectarian links, remain critical problems.*

# Key Surge Operations

# Al Qaeda in Iraq December 2007

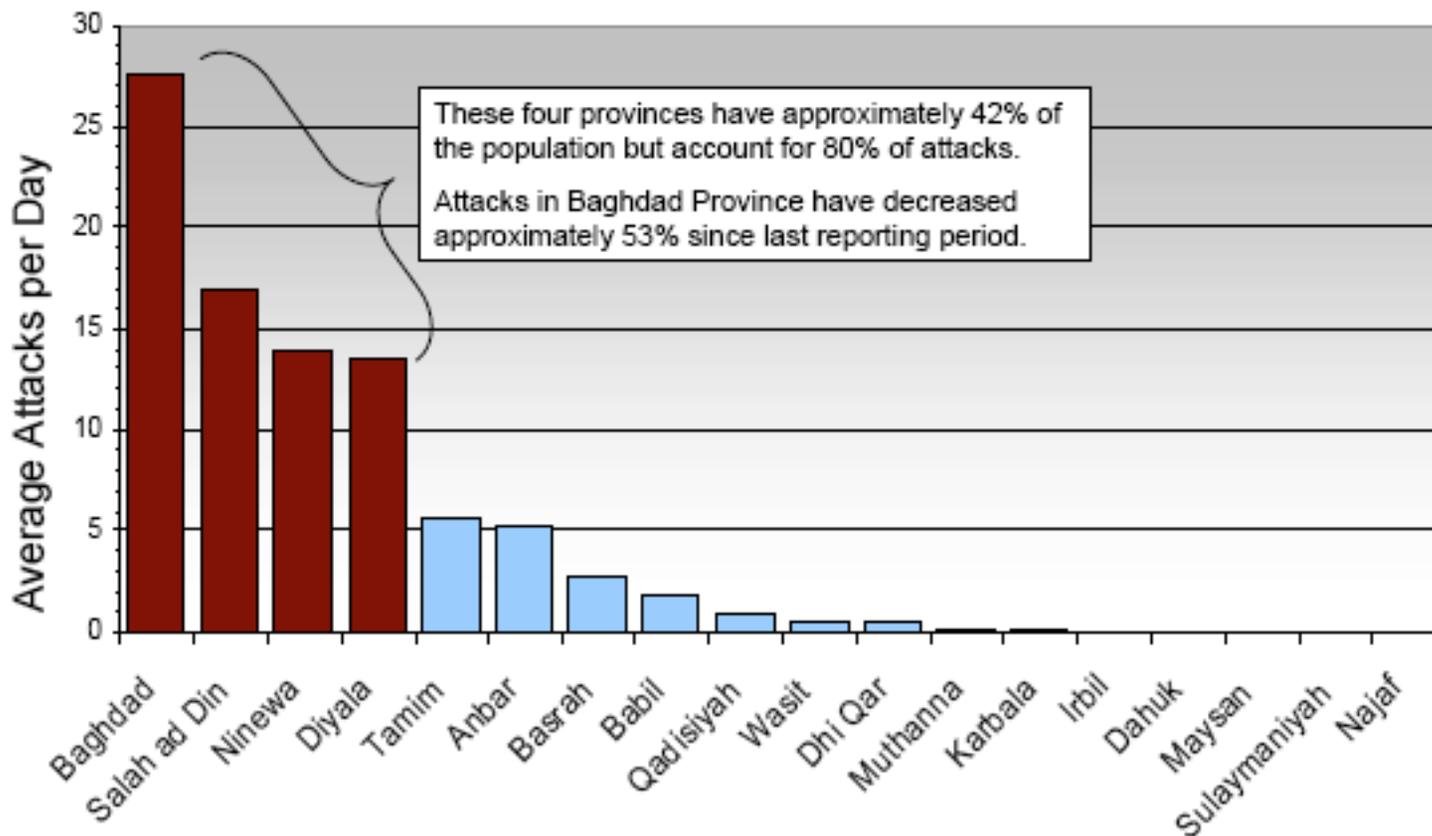

# **Remaining Violence Localized to Four Provinces**

## *But, still serious in mixed areas*

- **Baghdad Province is still the most violent area in spite of major drop in violence.**
- **Salah ad Din, Ninewa, and Diyala remain serious problem areas.**
- **Al Qa'ida in Mesopotamia seems to be trying to shift operations to Ninewa.**
- **May be problems in count because of difficulty in track all violent incidents nationwide**
- **Shift to Ninewa impacts on Arab-Kurdish-minority tensions.**

## Average Daily Attacks by Province July 2007 – November 2007

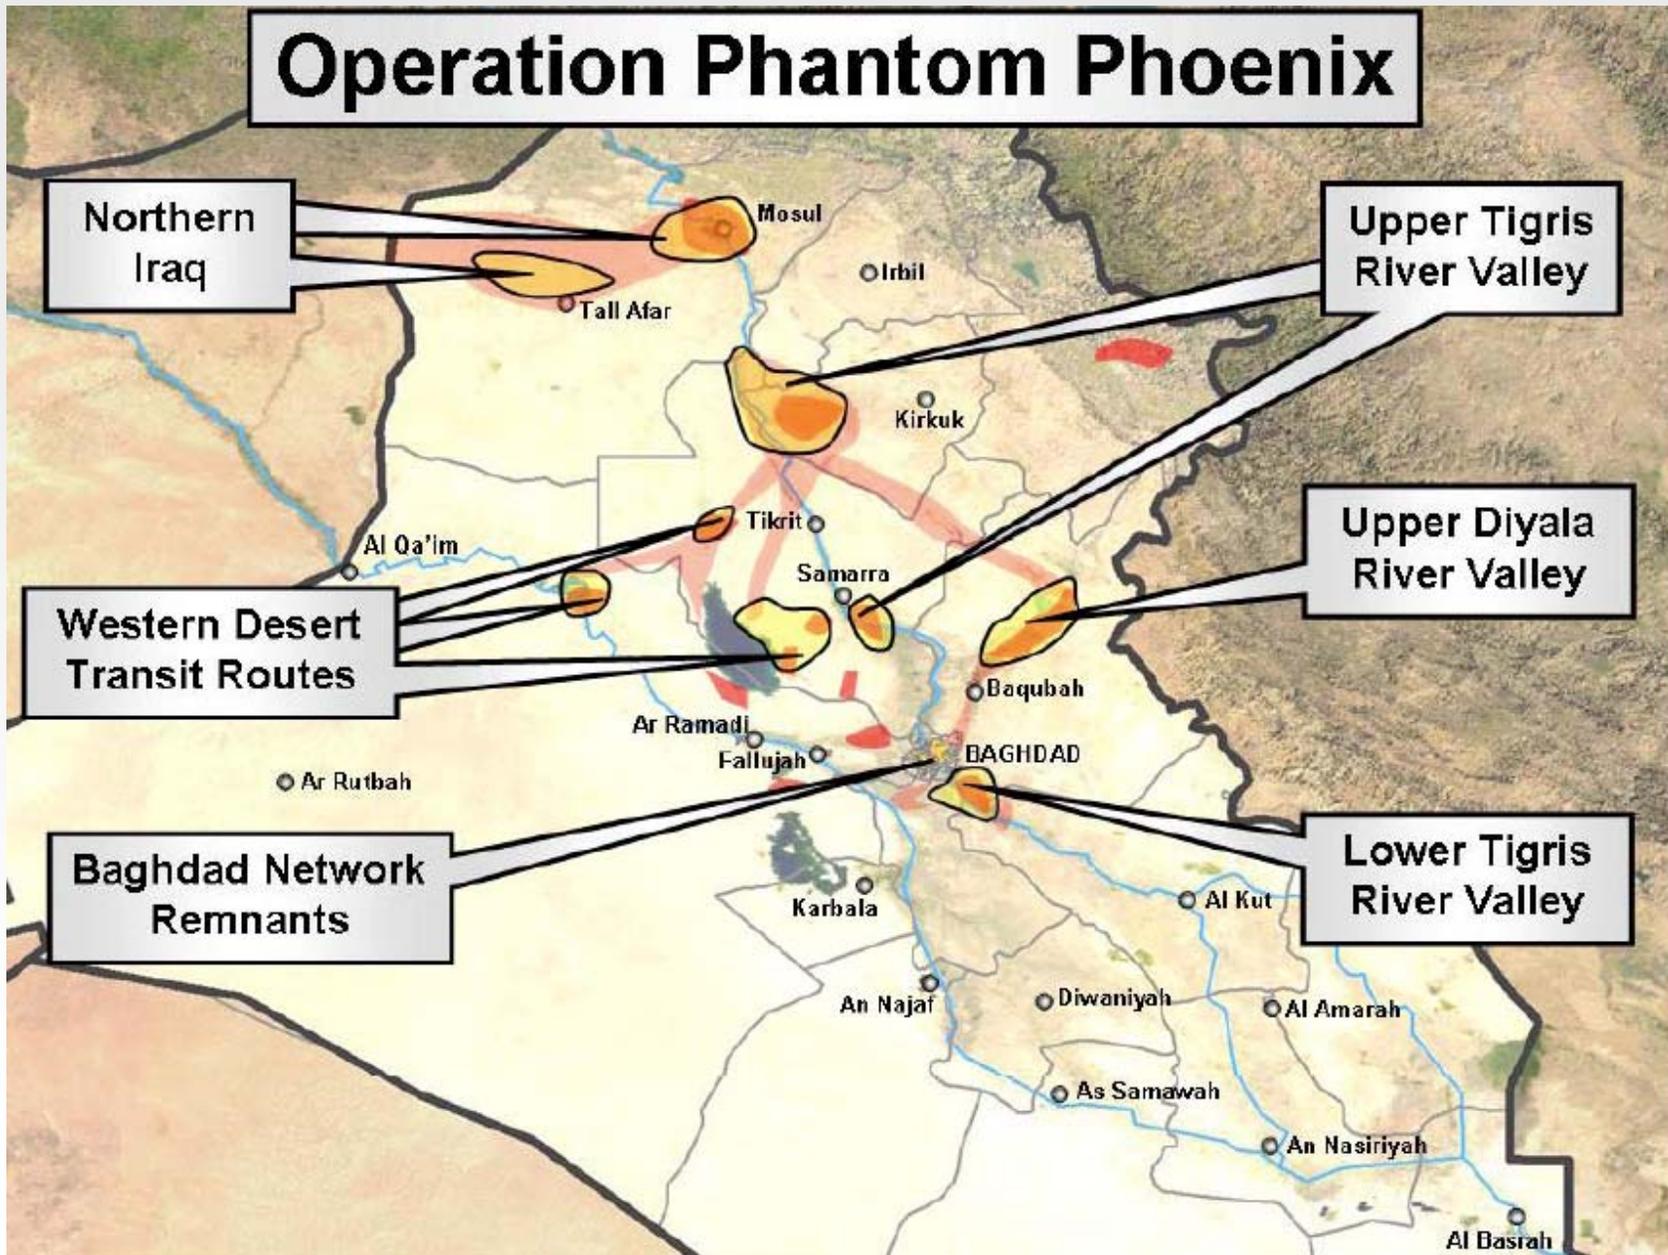

Source: SIGACTS III Database (Coalition Reports only) as of Nov 30 2007.

Data reflects enemy attacks targeted against Coalition, ISF, civilians, infrastructure, Iraqi government organizations and reconstruction operations centers.

# **Phantom Phoenix: The Continuing Operational Challenge: 1-16 January 2008**

- **18 battalion-level joint operations**
- **1,023 detainees**
- **121 enemy killed in action and 14 wounded in action**
- **92 high value individuals captured or killed**
- **351 caches found and cleared**
- **410 IEDs found and cleared**
  - **3 VBIED and IED factories dismantled**
  - **18 VBIEDs**
  - **25 HBIEDs**
- **4 tunnel complexes**

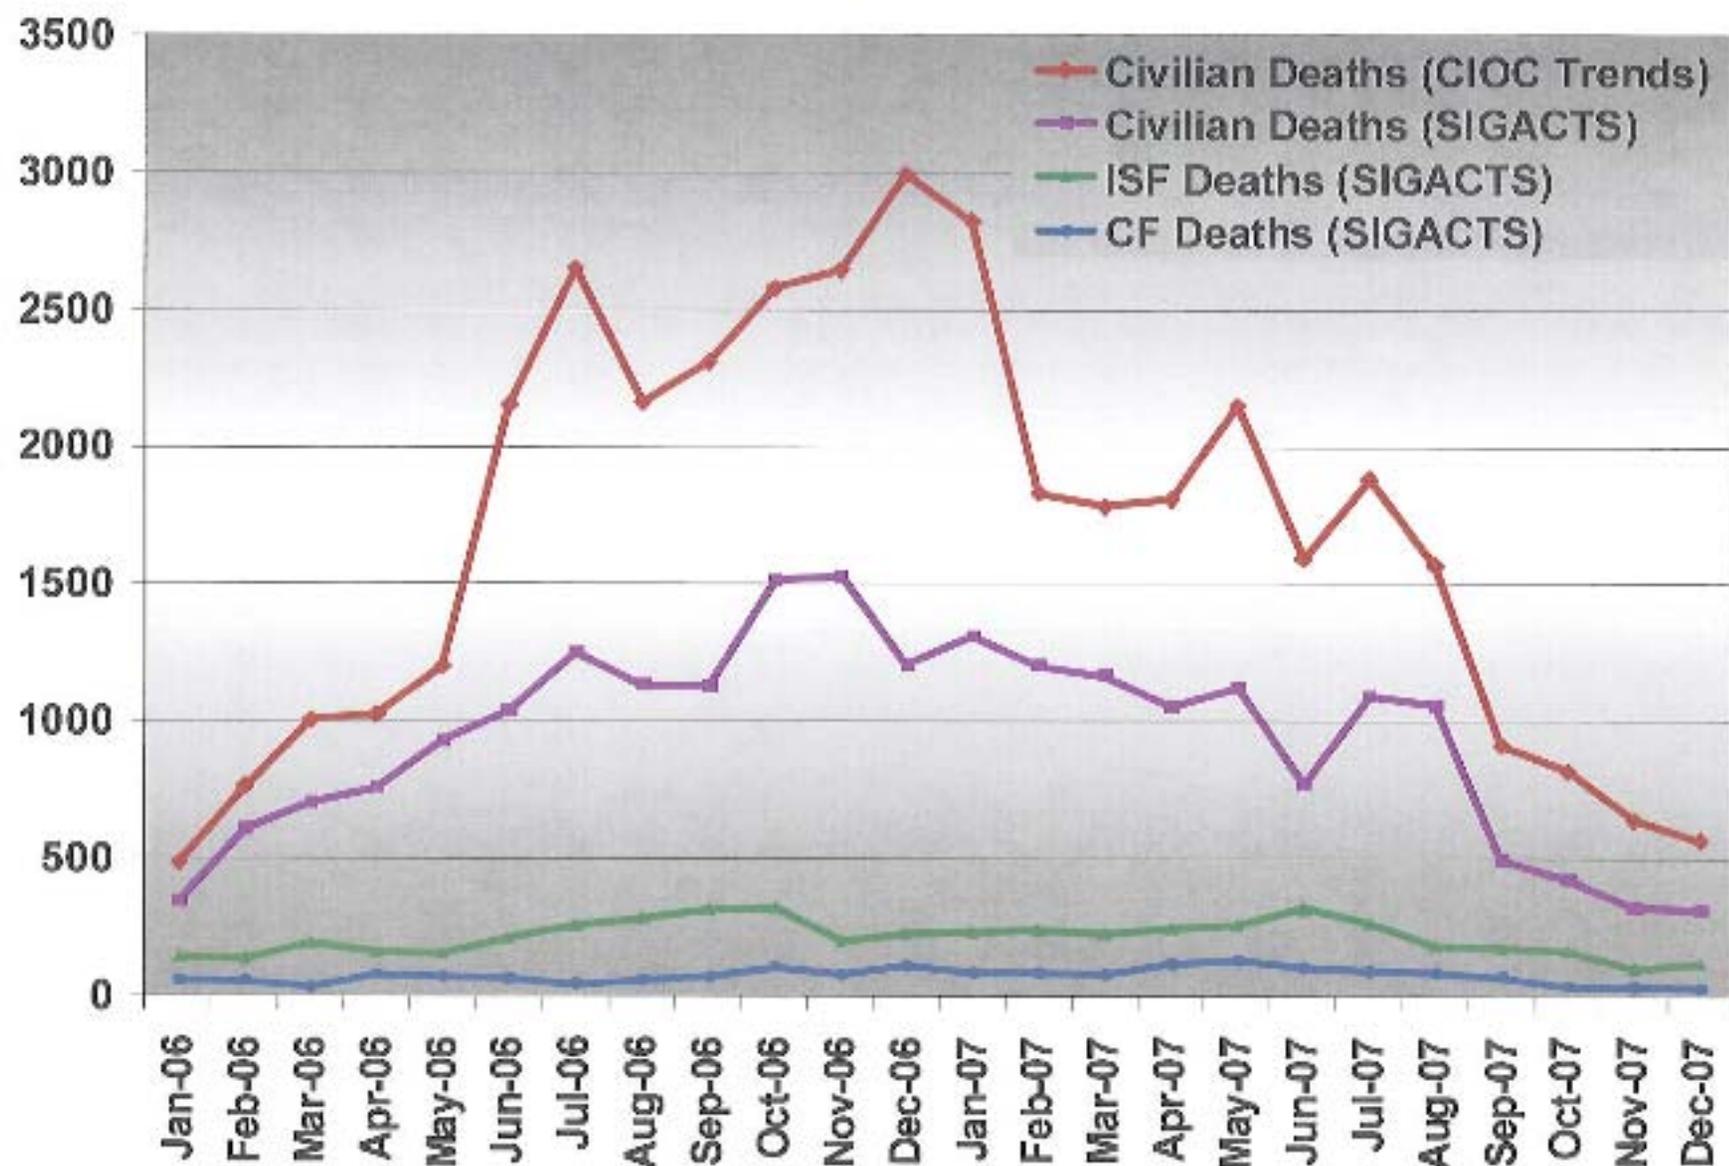

Source: MNF-I, January 17, 2008

## **Patterns in Overall Iraqi Violence: *Major Progress. But Not Yet Victory***

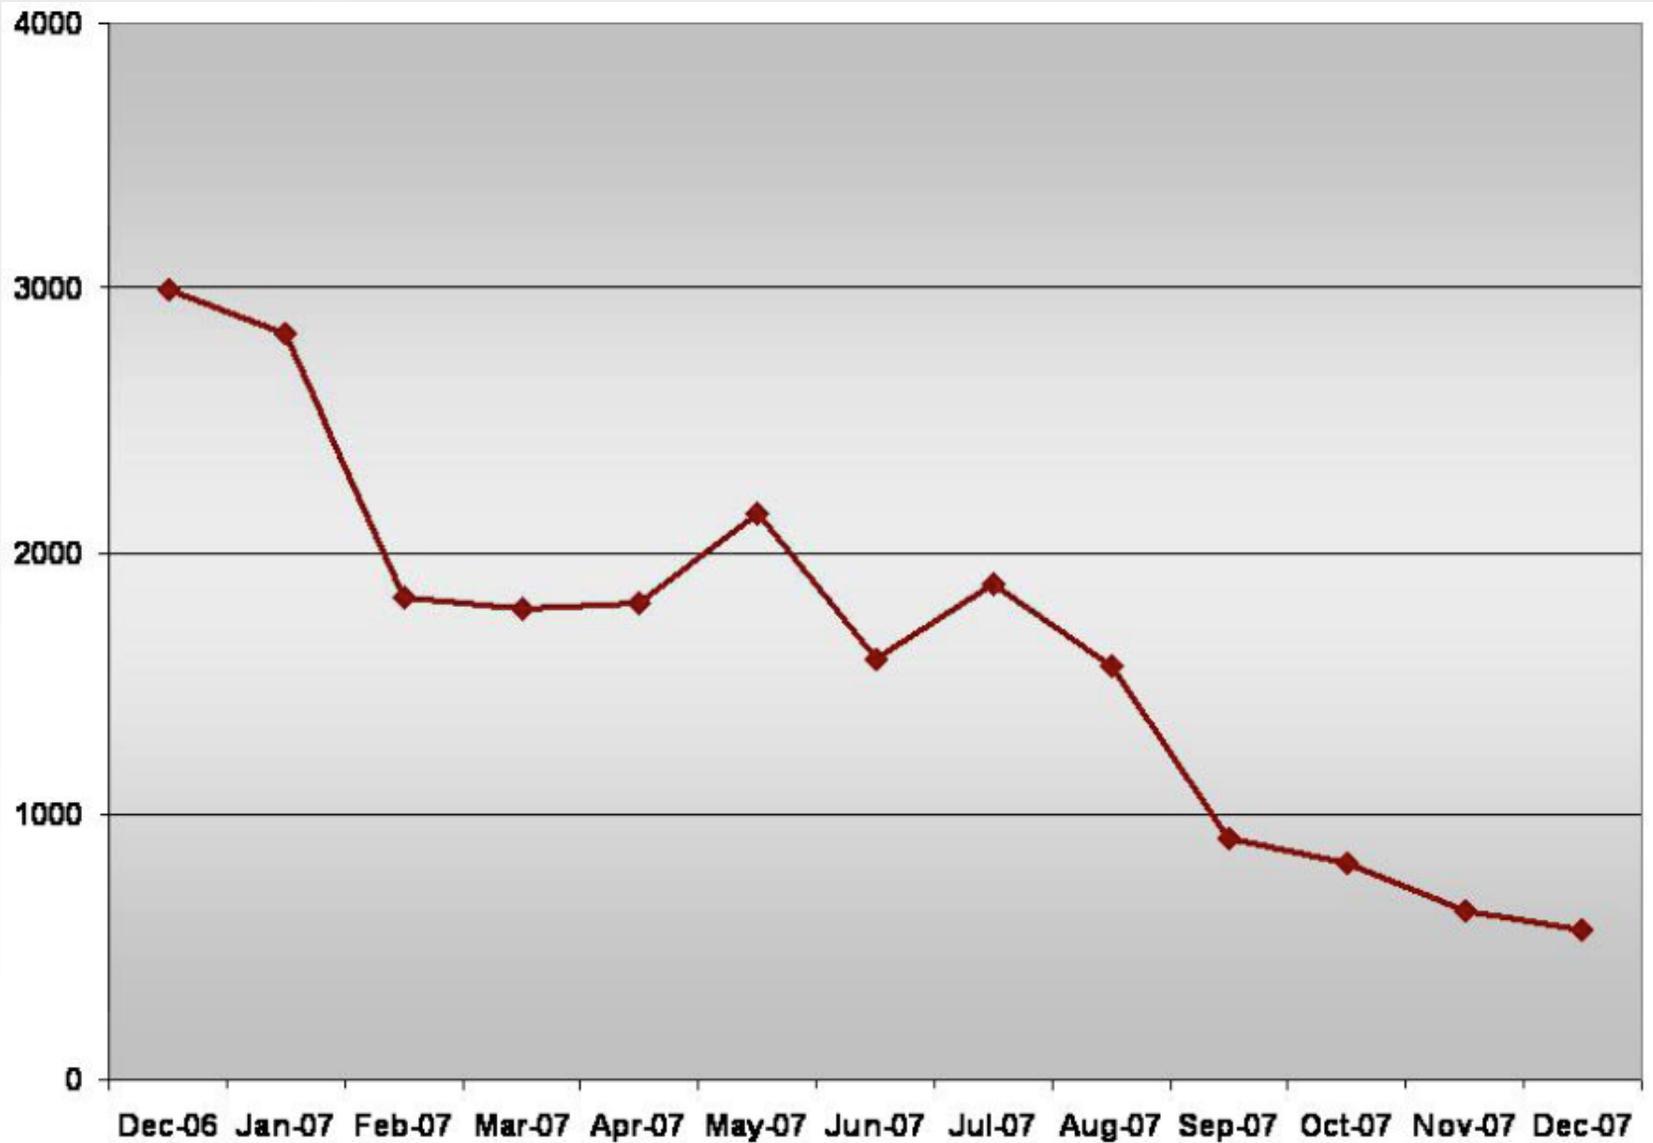

- **MNF-I Data in January 2008 show a major drop in deaths and violence in Iraq from early 2006 through mid January 2008**
  - **Civilian deaths are down to 1/6<sup>th</sup> of peak. Combined Coalition and Iraqi data show are down from peak of 3,000 per month in November 2006 to around 700 in December 2007. (Coalition count alone shows drop from over 1,500 in October-November 2006 to around 300 in December.**
  - **Attack frequency down to early 2005 levels by end of 2007; less than 40% of peak.**
- **Total high profile bombings down from peak of around 130 in June 2007 to around 40 in December 2007.**
- **IED explosions are down to about one-third of peak level in 2006-2007.**
- **Discovery of weapons and explosive caches – shaped heavily by Iraqi HUMINT – are well over twice 2006 levels nationally, and three times higher in Anbar.**

## Coalition, Iraqi Security Force & Civilian Deaths

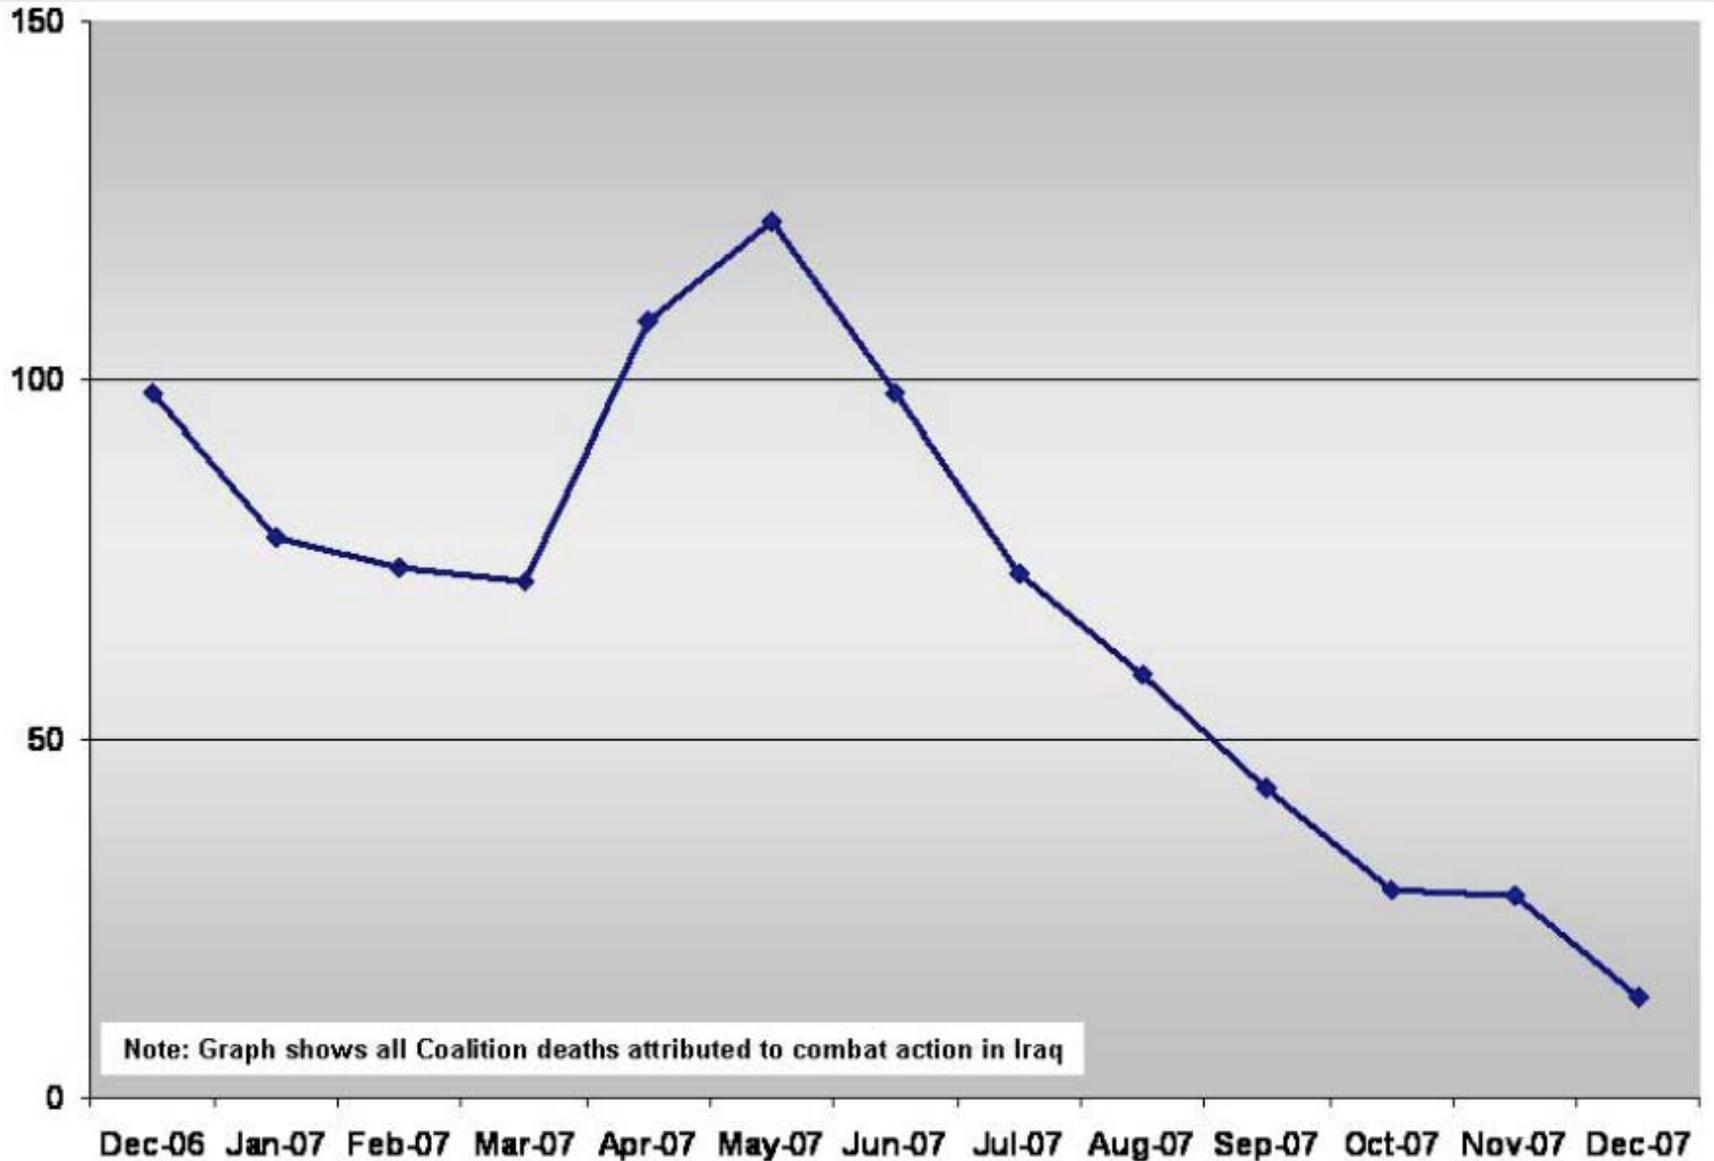

Source: SIGACTS (CF reports only) & CIOC Trends (CF & Iraqi reports checked for duplication) as of 12 Jan 08.  
Does not include civilian deaths due to accidents unrelated to friendly or enemy actions.

# Patterns in Ethno-Sectarian Violence: *The Worst Violence is Way Down*

**Ethno-Sectarian incidents – including Shi’ite on Shi’ite and Sunni on Sunni - down from peak of nearly 1,100 in December 2006 to a little over 100 in November 2007**

**Ethno-Sectarian deathss down from peak of nearly 2200 in December 2006 to around 200 in November 2007.**

“The more striking trend is the reduction in ethno-sectarian incidents and deaths. Both measures of ethno-sectarian violence have fallen below one-fifth of the levels of a year ago—and are now mostly limited to the mixed Sunni-Shi’a areas of west Baghdad and Rusafa. Earlier practices in which the community targeted by a car bomb retaliated, with a resulting increase in ethno-sectarian killings, have become less common over the past few months. This is in part attributable to the call for restraint by community leaders and by security measures such as the Joint Security Stations, checkpoints and “gated communities,” which promote better population security.

“The geographical concentration of attacks continues to shift as Coalition and Iraqi forces keep pressure on AQI and extremists, driving AQI further east and north as it searches for more secure operating areas and confronts local extremist groups that previously controlled those areas. As a result, high-profile attacks have increased slightly in Ninewa Province, while they have fallen off in Anbar and Baghdad. Specifically, improvised explosive device (IED) attacks in Anbar Province have dropped 91% from January 2007 to November 2007, while attacks in the ten Baghdad security districts declined 67% for the same period.

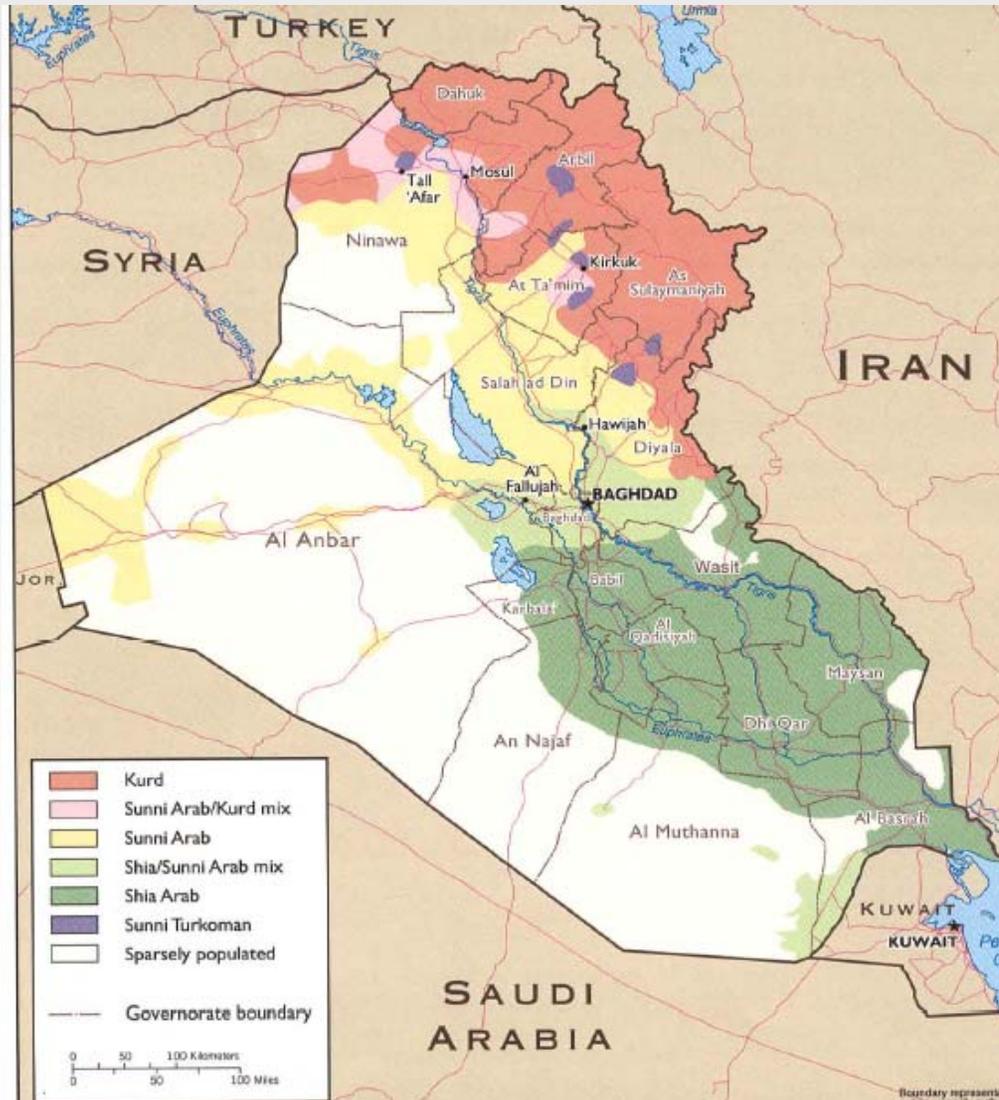

“The growing support of the local population resulted in the establishment of the Concerned Local Citizen (CLC) program in which a growing number of local citizens take part in the protection of their neighbor-hoods. 7 Some CLC groups form neighbor-hood watches, while others have been placed under U.S.-funded contracts to protect critical infrastructure. Some of the participants are reviewed for hiring by the Ministry of Interior (MoI). About 69,000 individuals are partici-pating as members of the CLC program; approximately 80% are Sunni and 20% are Shi’a. Members of CLC groups have chosen to protect their neighborhoods and many are from former insurgent and other illegally armed groups. They have been persuaded to fight against extremists under Coalition force supervision. The GoI has issued an order to the Iraqi Army and police forces requiring cooperation with CLCs. The CLC program is proving crucial to the counterinsurgency effort but the slow pace of integrating the CLC members into GoI institutions, lack of alternative employment and fears by the Maliki government that these forces may return to violence or form new militias are of concern. The CLCs will require continued assistance from Coalition forces until the GoI assumes full responsibility for the program.”

Source of Quotes: *Measuring Security and Stability in Iraq*, December 2007

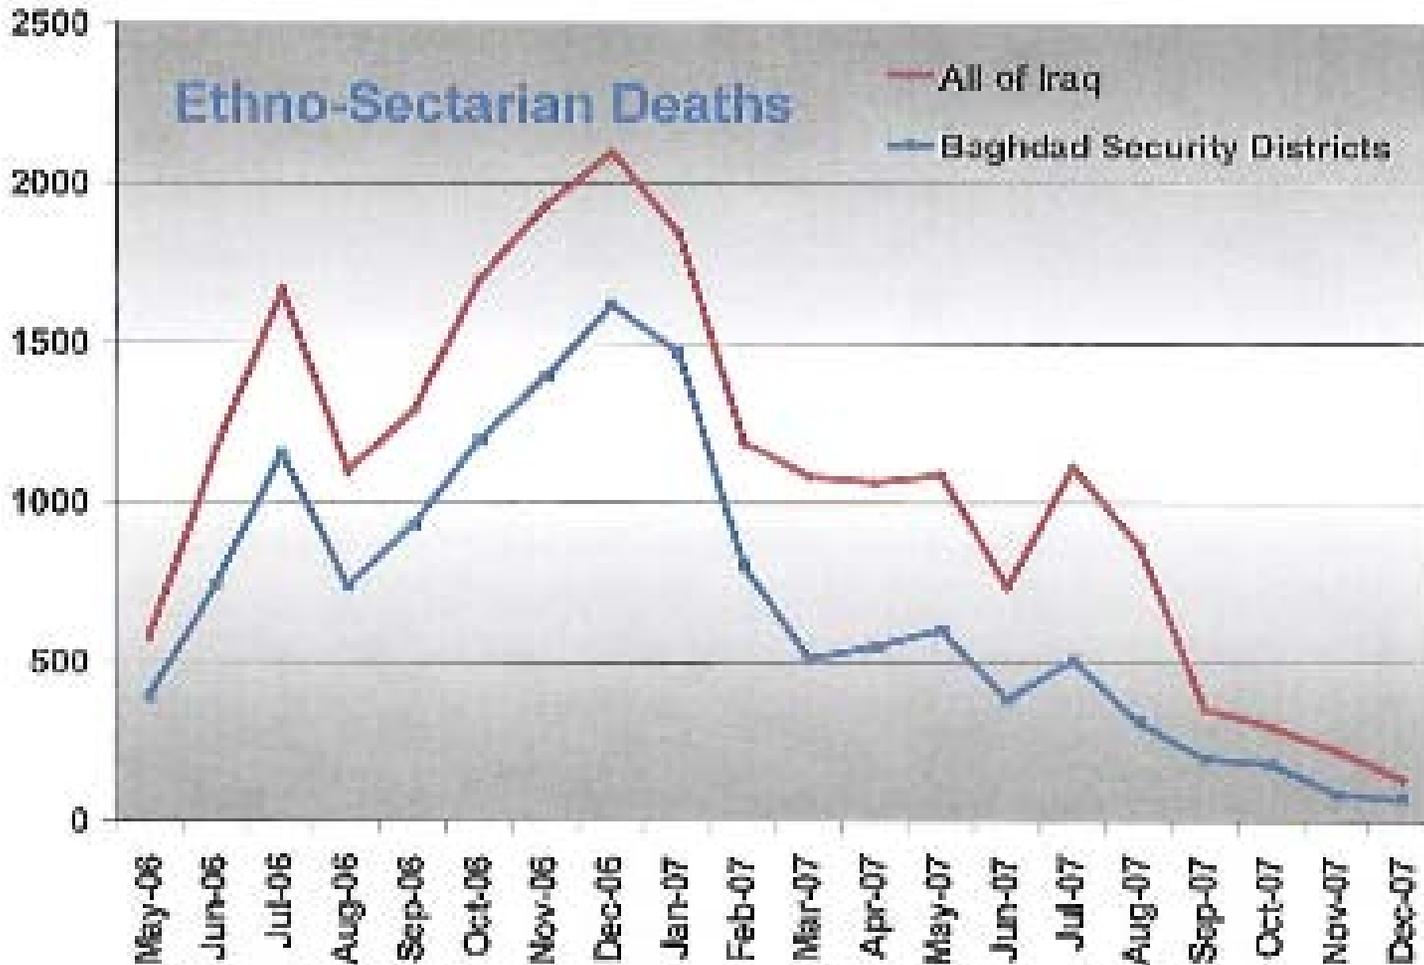

## **Ethnic and Sectarian Violence Is Also Down** *But, less violent problems remain very serious*

- **Ethno-Sectarian attacks – including Shi’ite on Shi’ite and Sunni on Sunni - down from peak of nearly 1,100 in December 2006 to a little over 100 in November 2007**
- **Ethno-Sectarian deaths down from peak of nearly 2200 in December 2006 to around 200 in November 2007.**
  - **Baghdad levels show similar drop**
- **Trends would be much clearer if shown by province for the high conflict provinces, or mapped in terms of sectarian and ethnic migration.**
- **Does not take account of lower levels of violence that still shape much of environment, displacements, extortion, home and business seizures, kidnapping that now characterize a large portion of sectarian and ethnic cleansing.**
- **Does not take account of pervasive criminal violence and extortion and corruption by police, security forces, and officials.**
- **Cannot gauge impact on repatriation of 2.4 million Iraqi refugees inside and outside Iraq.**

# Trends in Ethno-Sectarian Incidents and Deaths During Peak Period of Fighting in “Surge”

(Includes Shi'ite on Shi'ite & Sunni on Sunni)

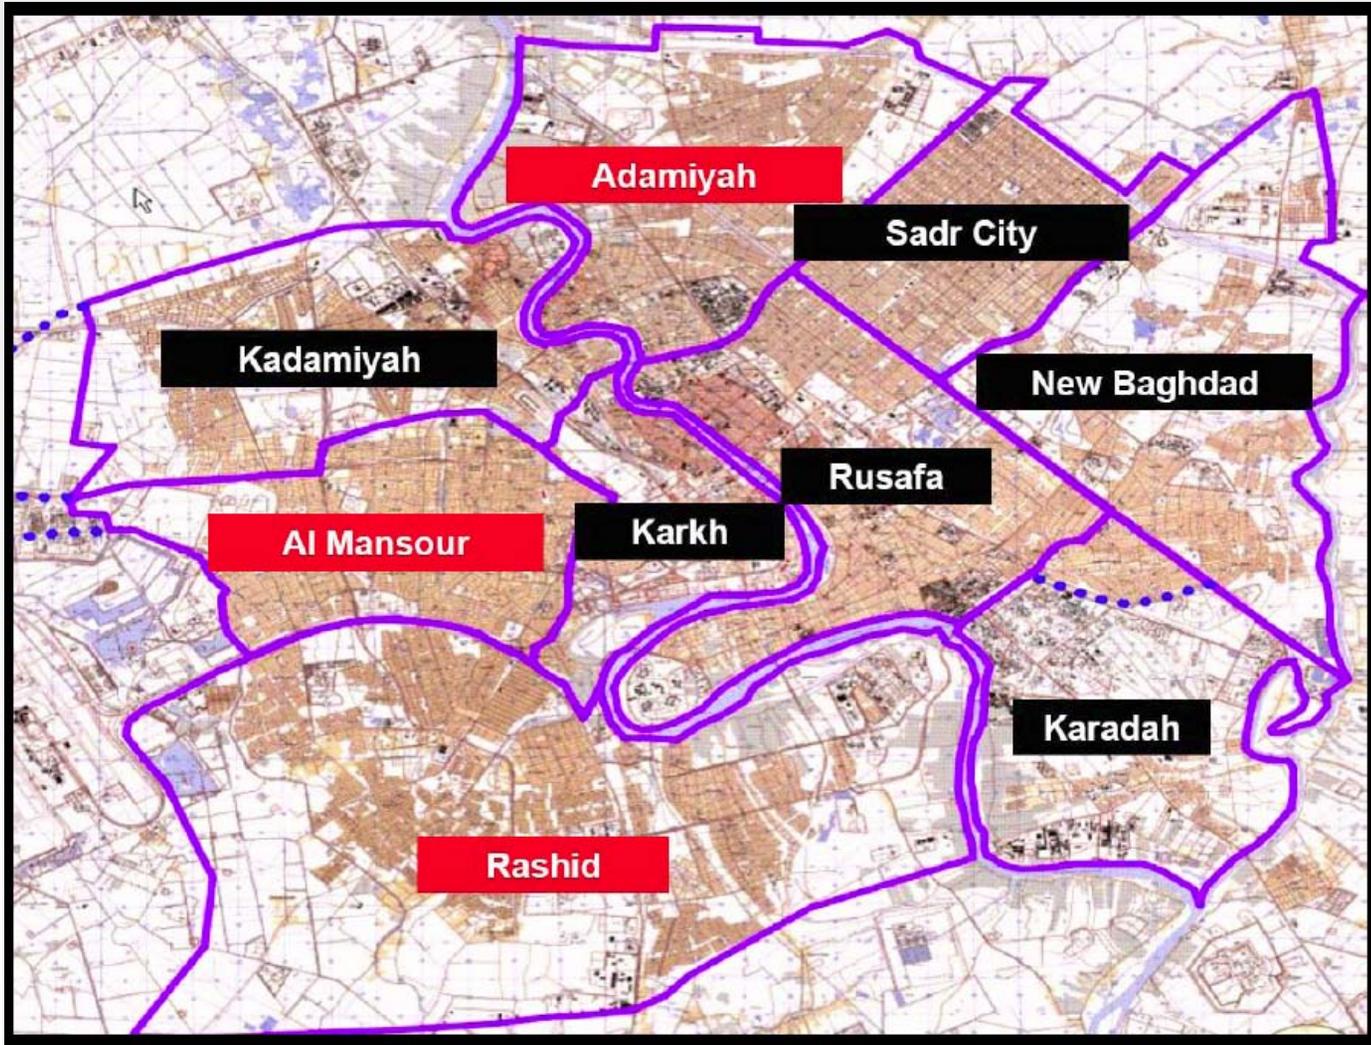

Source : *Measuring Security and Stability  
in Iraq, December 2007*

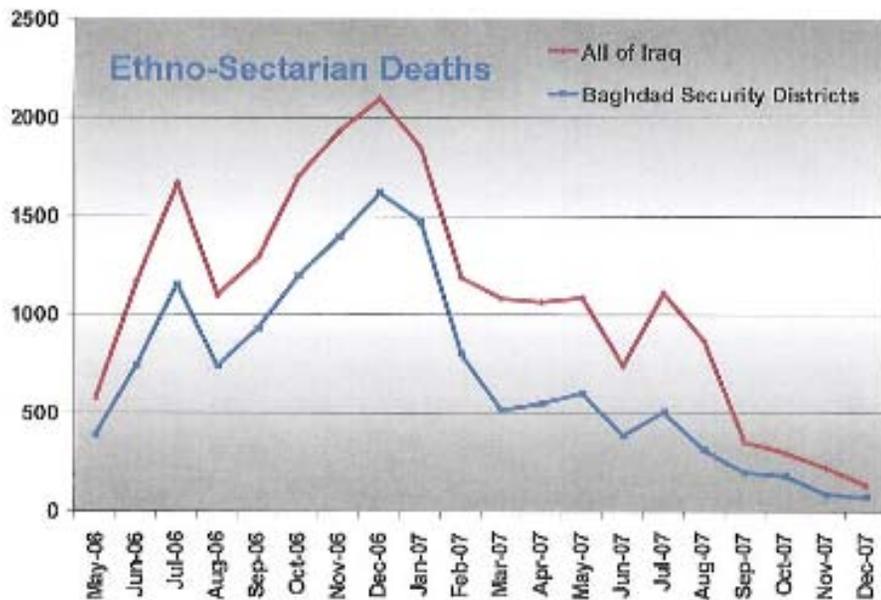

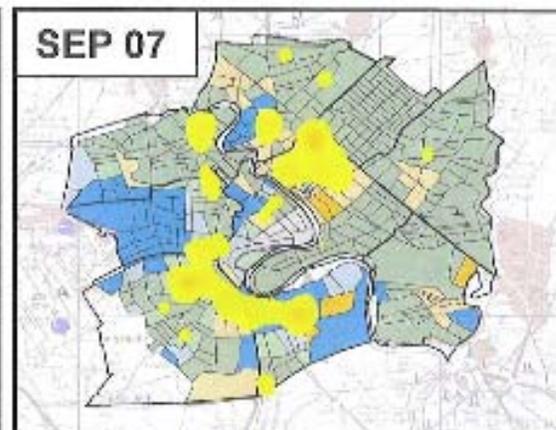

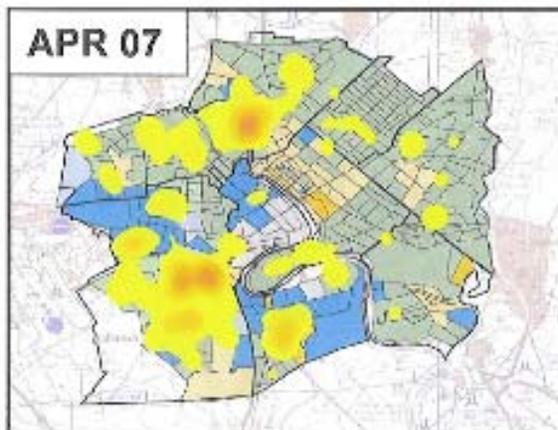

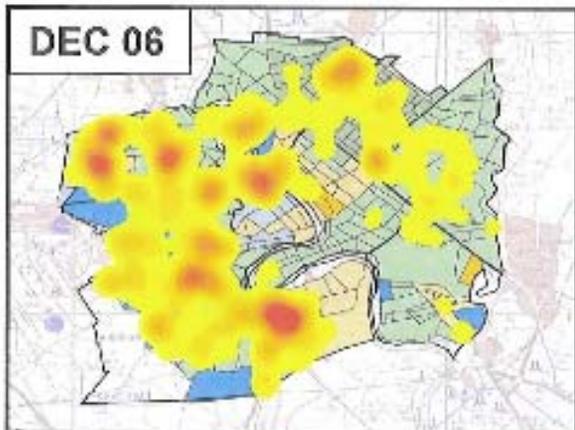

# Patterns in Violence and Casualties in Baghdad Show the Need For Strategic Patience

- **Very real progress in reducing ethno-sectarian violence in Baghdad in both terms of areas at risk and numbers of deaths.**
- ***But*, stable victory in the area where the US and Iraqi surge has been most effective still requires time and political accommodation.**
- **US ability to secure Sunni and Shi'ite zones, and some mixed areas, in Baghdad has not yet brought lasting stability and security to city.**
- **Rushing down US troops could leave too few troops to cover a renewal of sectarian cleansing in greater Baghdad and deal with most violent provinces, much less new outbreaks of fighting in North and South.**
- **Need time and US aid to provide Iraqi police and criminal justice system, effective government presence and services, and translate progress in accommodation at legal and legislative levels into stable, functioning city.**
- **Iraqi data for Baghdad are less favorable than US data. They are uncertain and may be exaggerated for Sadrism political purposes.**

# The Iraq Challenge

- **Success is an option, but half a decade of tasks remain:**
  - **Doubtful that can get rapid progress in conciliation, but slow conciliation is far better than division or civil war, and far easier to talk about abandoning Iraq than to do it if trigger a humanitarian disaster.**
  - **Consolidate progress in Iraq forces: Independent for internal security by 2012; create ability to defend against foreign threats by 2018.**
  - **Restructure police and criminal justice efforts, make local security real.**
  - **Build effective governance and services at national, provincial, and local level.**
  - **New focus on economic and aid dimensions; longer-term programs for petroleum, development, and aid.**
  - **Solve “federalism” and ethno-sectarian issues.**
  - **Contain or limit Iran, resolve Iraqi-Kurdish-Turkish issue, and reassure Sunni allies have not abandoned Iraqi Sunnis.**
- **If military succeeds, and political accommodation happens, need to phase out US forces at rate that best achieves Iraqi and regional stability.**
- **If efforts fail, need phased cuts tied to clear political efforts, aid, and at least option of seeking to bloc civil war turning into military bloodbath. Extreme caution in intervening, but need to develop a Plan B flexible enough to react to events in Iraq.**
- **Need to talk to key allies and powers in region now. Reassure that will not leave Gulf, will aid them in dealing with Iran, and seeking some form of stability in Iraq. Need clear basing plans to handle withdrawal from Iraq.**

- **Implement De-Ba'athification law (2008-2009)**
- **Deal with the issue of federalism in ways that resolve Kurd-Arab-Turcoman tensions; Shi'ite power struggle in south, Sunni concerns in west, mixed areas in center, and create a stable Baghdad. (2008-2010)**
- **Pass oil law, share revenues, renovate petroleum sector, and expand in ways acceptable to all factions. (2008-2009)**
- **Pass laws for provincial and local elections and create effective local authorities. (2008-2009)**
- **Define powers of local and provincial authorities, create effective mix of governance and services. (2008?)**
- **Revise constitution to meet needs of all major factions. (2008-2009)**
- **Create effective criminal justice system and local rule of law. (2008-2010)**
- **Government spending and revenue sharing that meet both ethno-sectarian concerns and practical needs of governance. (2008-2009)**
- **Revive national infrastructure in terms of water, power, roads, rail, petroleum exports, financial institutions, communications, etc. (2009-2011)**
- **Create economic base for jobs, growth, acceptable levels of employment and income distribution. (2008-2014)**

- **Create Iraqi-US security plan and relations for true strategic partnership (2008-2009)**
- **Iraqi force development: The Defense Minister's Timing:**
  - **Create Iraqi army and police strong enough to take over internal security tasks (2012-2014?)**
  - **Create Iraqi army, air, and navy capable of all internal security tasks (2015?)**
  - **Create Iraqi forces capable of defending nation against all external threats (2018?)**
- **Resolve the problem of National Police, local forces, ethnic and sectarian militias and integrate into ISF or civil economy. (2009-2011)**
- **Create an effective mix of local, provincial, federal, and national police, courts, and rule of law. (2008-2011)**
