SEVEN REVOLUTIONS

at CSIS

FRAMEWORK

FOR YOUR FUTURE

SEVEN REVOLUTIONS IS WHAT WE CALL THE LARGEST DRIVERS OF CHANGE IN THE WORLD OVER THE COMING DECADES. In an hour-long presentation, we explore where these drivers currently stand, and engage the audience on how decisions today can change the course of the seven revolutions. Seven Revolutions is a framework for considering the future—and how you and your organization can be successful in it.

PRESENTED TO THE BOARDS AND SENIOR MANAGEMENT of companies like GE and Walmart, to leading universities, and leaders from defense, government, and diplomacy from around the world, Seven Revolutions is focused on bringing you the best thinking about the future.

In each of the Seven Revolutions, we will share with you the most current perspectives and insights about emerging trends and issues, focused in the seven driving areas:

POPULATION • RESOURCES • TECHNOLOGY • INFORMATION •
ECONOMICS • SECURITY • GOVERNANCE

MANAGE

YOUR OWN FUTURE

SEVEN REVOLUTIONS IS DESIGNED TO SPUR QUESTIONS AND INTERACTION WITH THE AUDIENCE. Ultimately we are successful if our audience thinks critically about how each of them, and their organizations, are influenced by—and can influence—the drivers of change in the world. Using this framework we hope that civil society, associations, corporations, governments, and academic can better prepare for the rapidly shifting landscape and develop a more nuanced strategic planning perspectives that guide their activities over the long-term.
